

PROTOTYPE — PUBLIC-DATA DEMO — NOT FOR SIGNATURE — generated from a rebuilt editable template. Sections 5, 9, 11, 12, and 15 are populated from sourced data; remaining sections are Phase 2 placeholders. Not a signed government determination.

MARKET RESEARCH REPORT (MRR)

MAY 2026 — RFO-aligned template (rebuilt editable copy)

This optional Market Research Report (MRR) template facilitates collaboration between requiring activities and contracting offices. It streamlines the documentation of Government estimates, commerciality determinations, and market research results. It is intended for actions exceeding the Simplified Acquisition Threshold (SAT) or actions that could lead to a bundled contract. Once completed, it becomes a formal part of the contract file and acquisition planning process.

The FAR, DFARS, and AFARS references in this template implement the Revolutionary FAR Overhaul (RFO) and DFARS RFO Class Deviations, effective 01 February 2026. It is the responsibility of the users of this template to validate all references. It also contains the information to address an individual or class Request for Approval (RFA) to procure non-commercial products or services, in accordance with the EO 14271 implementation guidance dated 27 May 2025.

Note: Tailor all aspects to the individual acquisition. Delete sample/instruction language (shown here in grey italics) before submission. If a paragraph does not apply, indicate “Not applicable” and explain why. Market Research is generally unclassified, but may require Controlled Unclassified Information (CUI) markings. Use CAC digital signatures per Army Regulation 25-50.

Report type: *Commercial | Non-commercial (RFA) — Individual | Class (choose)*

Part 1 – General Information

1. Product/Equipment/Service/Program

Small-business market for SABER construction at Vandenberg Space Force Base — Department of the Air Force (U.S. Space Force)

Run ID: Q0bJhop7i8qnlSbVgY0g7w

Report generated: 2026-10-07T08:16:47.322Z

2. Points of Contact

[To be completed — Phase 2]

Prepared by: *Typed name / Title / Email / Date*

Technical/Requirements: *Typed name / Title / Email*

3. Contracting Activity

[To be completed — Phase 2]

Contract Specialist: *Typed name / Title / Email*

Contracting Officer: *Typed name / Email*

4. Independent Government Estimate (IGE)

[To be completed — Phase 2]

The estimated value of this effort is \$[value], including all options and FAR 52.217-8. The IGE contains a certification that the Government independently developed the IGE prior to seeking formal proposals. For non-commercial, include narrative and analytical detail (assumptions, tools, sources). See the DoD IGE Handbook.

Item	Quantity	Delivery Date	Estimated Unit Price	Estimated Value
[Fill]	[Fill]	[Fill]	[Fill]	[Fill]

Period	Period of Performance (POP)	Estimated Value
Base	[start] through [end]	\$(value)
Option 1	[start] through [end]	\$(value)
Option 2	[start] through [end]	\$(value)
Option 3	[start] through [end]	\$(value)
Option 4	[start] through [end]	\$(value)
FAR 52.217-8	[start] through [end]	\$(value)
Estimated Overall Total Price		\$(total)

5. Taxonomy

Portfolio Group: [To be completed — Phase 2]

Portfolio: [To be completed — Phase 2]

PSC: Unknown / Insufficient evidence — no PSC supplied; keyword coverage does not establish product identity

PSC Description: Unknown / Insufficient evidence — no primary PSC established

NAICS Code: 236220 Size Standard: \$45.0 million in average annual receipts (13 CFR 121.201 on eCFR, current as of 2026-10-05; section last amended 2023-03-17)

NAICS Description / Index Category: Commercial and Institutional Building Construction

Basis for NAICS selection: Measured against federal obligations matching the exact phrase "SABER": \$21.9M across 18 NAICS code(s). 236220 represents 68.1% of that PHRASE market (not the entire NAICS 236220 federal market). Keyword-coverage dollars are NOT the size of the entire primary-NAICS market and MUST NOT be equated with it. Coverage set (18 code(s)): 236220, 541715, 334511, 541712, 541690, 541511, 513210, 541519, 541614, 423450, 444130, 332992, 315990, 332999, 325199, 518210, 927110, 541330.

Measured market for keyword "SABER": \$21,901,743; cumulative coverage 95%.

Measurement basis: Federal prime-contract obligations matching the exact keyword phrase, as measured by Mindy from USASpending. Keyword coverage is measured over a single fiscal year and is an exact-phrase match, so it is a lower bound on the addressable PHRASE market. It is not a census of the entire primary-NAICS market and must not be silently equated with one.

Size standard source: U.S. Small Business Administration, Table of Small Business Size Standards, 13 CFR 121.201, read from eCFR (current as of 2026-10-05; section last amended 2023-03-17).

<https://www.ecfr.gov/current/title-13/section-121.201>

Keyword selection rule: The requirement's stated keyword is used verbatim. Keywords derived by derive_company_keywords are recorded as supporting vocabulary only and never substituted, because USASpending keyword search is exact-phrase and substituting a broader phrase would silently change the measured market.

6. Description of Supplies/Services

[To be completed — Phase 2]

Describe the Government's need (not what the contractor will provide). Include quantity/POP and estimated total value. Address: what is the service/product; components/elements; performance requirements; what it supports; when/where required; geographic limits; unique/mandatory-source requirements; other agencies buying it; available contract vehicles; related requirements.

7. Performance Requirements

[To be completed — Phase 2]

State the critical performance requirements and how they are measured. What commercial solutions address the requirement? If non-commercial, what military-specific requirements must be met? How does industry sell/describe the service?

8. Background

[To be completed — Phase 2]

Brief background so an unfamiliar reader understands the need. Is the requirement new or recurring; how has it been resourced to date; prior acquisition strategies; prior contractor performance; barriers to competition removed; problems in prior performance; past-performance baseline; marketplace changes; lessons learned.

9. Procurement History

Reasonable efforts to retrieve prior contract data are expected (records, contract files, competition advocate files). Provide the table below plus narrative subparagraphs (a–e) covering source selection method, commerciality, and basis for fair and reasonable pricing.

BUYER / CONTRACTING HISTORY: rows below were retrieved with the scoped contracting-office predicate. Awards performed at the installation but bought by another agency are INSTALLATION CONTEXT and are not listed as this office's history.

PREDECESSOR CANDIDATE IS INSTALLATION CONTEXT: work at the scoped installation bought by another agency — not buyer history for the scoped contracting office.

Contract Number	Type	Method	Offers	Amount (lifetime to date)	Period of Performance

Contract Number	Type	Method	Offers	Amount (lifetime to date)	Period of Performance
FA461021F0004 — CM CONSTRUCTION SERVICES, INC. USASpending source	FIRM FIXED PRICE	— ¹	— ¹	\$2,913,790	2020-10-19 → 2024-11-09
FA461022F0058 — SEALASKA CONSTRUCTORS LLC USASpending source	FIRM FIXED PRICE	— ¹	— ¹	\$2,759,943	2022-07-22 → 2024-05-06

¹ — means USASpending did not report the procurement method or number of offers for that award. It is not zero. Amounts are each award's lifetime obligations to date, as reported by USASpending.

Award history: 25 award(s) made by contracting office FA4610, matched on the awarding office code (BUYER / CONTRACTING HISTORY). Work at the installation bought by another agency is listed separately as installation context.

Predecessor / incumbent: Degraded — no sufficiently consistent predecessor award established — candidate awarding activity "Department of the Army / Department of Defense" does not correspond to requested "Department of the Air Force"; a shared department is not sufficient; candidate office "ENDIST" does not match requested contracting office FA4610. INSTALLATION CONTEXT: work at the scoped installation bought by another agency — not buyer/contracting history for the scoped office.

The candidate award returned by the incumbent lookup did not satisfy the agency and NAICS consistency checks required to identify it as a predecessor. It is retained in the Sourced Evidence Appendix for reviewer judgement and is not asserted here as the incumbent.

a–e. Narrative: *contract number, awarded contractor, description, method (SBSA/8(a)/unrestricted/sole source), contract type, POP, total awarded amount, number of option periods, number of offerors, source selection method, basis for fair & reasonable pricing, commerciality.*

10. Non-Commercial Rationale (RFA)

[To be completed — Phase 2]

Complete only if pursuing a Government-unique/custom/non-commercial product or service. Per DPCAP memo on EO 14271 (27 May 2025), provide the individual or class RFA justification. Include the required RFA statement.

11. Potential Supplier Information

Vendor Name	CAGE Code	Business Size	Location	Point of Contact	Capability Assessment

R.T CONTRACTOR CORP. · UEI EYZKZNRMNJA8	6C5E7	Small (SAM self-certified for NAICS 236220; not an SBA size determination) · 8(a), SDVOSB	GARDEN GROVE, CA	Unknown ¹	Capable · 57 federal awards (all NAICS)

¹ Unknown means the source did not report the value. It is not zero and not "no". Parent companies come from current USASpending parent records; a firm whose parent cannot be confirmed is not counted toward the Rule of Two.

Supplier population — each figure states what it was counted from:

- 2,442 small businesses registered in SAM for NAICS 236220 in California
- 96 of those have held a federal prime contract in NAICS 236220 (3.9% of the 2,442 registered firms)
- 50 firms scored by Mindy, a limited sample drawn from contract holders first (2.0% of the 2,442 registered firms)
- 44 of the 50 scored firms show capable or active performance (88.0% of the 50 scored firms)
- 15 highest-scoring firms listed with full detail (30.0% of the 50 scored firms)
- 14 distinct parent companies among those 15 firms
- 1 listed firm(s) whose parent company could not be confirmed; not counted toward the Rule of Two

Scope: California small-business capacity for NAICS 236220. These firms are statewide market capacity, not the contracting office's own suppliers.

Efforts to locate sources: Mindy searched active SAM registrations for small businesses in NAICS 236220 located in California, scored them on their federal award history, and resolved parent companies through USASpending. Of 2,442 small businesses registered in SAM for NAICS 236220 in California, 96 (3.9%) have held a federal prime contract in that NAICS. Mindy scored 50 of them; 44 of the 50 show capable or active performance. The 15 highest-scoring firms are listed with full detail. They belong to 14 distinct parent companies (1 with a parent not confirmed). The search covers the NAICS and state only; it does not filter by contracting office, installation or PSC.

§11 limitations:

- The supplier evidence is a sample, not a census: the firms Mindy scored are a limited subset of the registered small businesses, and the supplier counts describe that sample.
- Certification source matters: 8(a) and HUBZone come from SAM's SBA-certified field (vetted). WOSB, SDVOSB, and VOSB are self-certified business types in SAM (not independently vetted here). The rubric weights vetted certifications higher; verify self-certified status before a set-aside determination.
- Activity (award history, revenue) is sourced from USASpending. "Registered Only" firms have no relevant award history and are shown separately — they do not count toward the Rule-of-Two depth.
- Small-business status is SAM's per-NAICS representation for 236220 (sbaSmallBusiness), SELF-CERTIFIED by the entity in its SAM registration — not an SBA size determination and not a socioeconomic certification. Source: sam_bulk_extract:SAM_PUBLIC_MONTHLY_V2_20260802.ZIP. Firms where SAM supplied no status for this NAICS are excluded from the small-business pool; that is "not stated", not "not small".
- Parent companies come from current USASpending parent records. Sister companies under the same parent are not searched for separately.
- California small-business capacity for NAICS 236220. These firms are statewide market capacity, not a list of the contracting office's own suppliers.

12. Small Business Opportunities

Rule of Two determination: Not determined

Recommendation: Insufficient evidence to support a set-aside: the supplier evidence is a sample, not the full market (Mindy scored 50 of the 2,442 registered small businesses); 14 distinct small-business parent companies with capable performance were found among the listed firms. That shows such firms exist, but this report does not turn a sample into a market-wide Rule-of-Two determination. Scope of this evidence: California small-business capacity for NAICS 236220; the supplier search did not filter by contracting office FA4610.

Capable small-business parent companies counted: 14. They are counted among the firms listed in §11, not across the whole market.

Counted parent companies: I.E.-PACIFIC, INC. (UEI GXLFMFL81MD3); V. LOPEZ JR. & SONS GENERAL ENGINEERING CONTRACTORS, INC (UEI MKVHWMBN7NZ6); SYGNOS INC (UEI DN6TFNNHU3B3); PATRIOT CONSTRUCTION, INC. (UEI N6F2MJSH4WM8); CM CONSTRUCTION SERVICES, INC. (UEI K71UDVLLQ2J6); IRONWOOD COMMERCIAL BUILDERS INC (UEI NFGMJQ662UL6); COX CONSTRUCTION CO (UEI NDVPM1NN8XL7); NOMLAKI TECHNOLOGIES, LLC (UEI RUD6FNNARHQ3); RORE, INC. (UEI GSGLJBC5LJK8); J. I. GARCIA CONSTRUCTION, INC. (UEI GRGVD98552T5); STRATEGIC INDUSTRY INC (UEI NM6KLD3BTZY9); BILBRO CONSTRUCTION COMPANY, INC. (UEI NU7AU7Z3PLL7); PER-GEESH CONSTRUCTION CORPORATION (UEI MBWLYCYQA8F7); R.T CONTRACTOR CORP. (UEI EYZKZNRMNJA8)

Not counted toward the Rule of Two: 1 firm(s): parent company could not be confirmed (UEI HHRZKNJMJYF7)

Socioeconomic status of counted parent companies (from SAM): 8(a) 2 · HUBZone 3 · SDVOSB 5 · WOSB 5 · EDWOSB 0

Agency small-business context: Department of the Air Force, FY2025 (latest complete fiscal year): 7.1% of contract obligations were made under small-business set-aside codes. By program: general small-business set-aside 4.7%; 8(a) / SDB 1.7%; SDVOSB 0.2%; WOSB / EDWOSB 0.1%; HUBZone 0.3%. This is a floor on small-business participation, because small firms also win unrestricted awards. It is not comparable to the government-wide small-business goals, which SBA measures against small-business-eligible dollars. Source: USASpending.

§12 limitations:

- A sample, or unresolved small-business status, stays "not determined"; this report never reports it as met or not met.
- The supplier search was filtered by NAICS and state only. It does not show which firms sell to the scoped contracting office.

13. Mandatory Sources (FAR Part 8 / DFARS Part 208)

[To be completed — Phase 2]

Sources screened: AbilityOne, Federal Prison Industries, Federal Supply Schedules, Enterprise Software Agreements (incl. CHES), other preferred sources. Note date and include documentation in the contract file; if eligible offerings exist but will not receive award, document the waiver/purchase exception.

Part 2 – Detailed Market and Industry Analysis

Market Research Objectives

- Refinement of the requirement in industry terms/standards
- Increased competition; increased small business participation
- Understanding of cost; effective contract structure; incentive viability
- Metrics on cost/schedule/performance; major subcontractor involvement
- Early OCI risk identification and mitigation; intellectual property landscape
- Government Furnished Material/Equipment/Information/Real Property considerations
- Determination of commercial service availability

14. Market Research Techniques Used

[To be completed — Phase 2]

Describe the methods used to arrive at findings. Examples/technique log:

- Query government databases: SAM.gov, FPDS-NG, Service Contract Inventory, GSA Acquisition Gateway
- Web searches (SD-5, appendix A); review recent market research on similar requirements
- Formal RFIs / Sources Sought / draft PWS-SOW-SOO in SAM.gov Contract Opportunities
- Engage knowledgeable government/industry personnel; interview KOs, CSs, small business specialists
- Review Federal Supply Schedules and GWACs (Alliant, SEWP, OASIS, PSS)
- Industry days / pre-solicitation conferences; category manager engagement

15. Market Intelligence / Industry Analysis

a. Measured market and supplier structure (AUTO — sourced). Commerciality determination (template item b) remains Phase 2 / KO-owned and is not asserted here.

Total measured market: \$21,901,743. Measurement basis: Federal prime-contract obligations matching the exact keyword phrase, as measured by Mindy from USASpending. Keyword coverage is measured over a single fiscal year and is an exact-phrase match, so it is a lower bound on the addressable PHRASE market. It is not a census of the entire primary-NAICS market and must not be silently equated with one.

Supplier concentration: Largest NAICS share 68.1% — 236220 (commercial and Institutional Building Construction) of the measured keyword-coverage market

Market diversity: 18 NAICS codes in the §5 coverage set

Small business footprint (from §12): Unknown / Insufficient evidence — not stated — the small-business evidence in §12 is a sample, so a market-wide small-business footprint is not reported

Socioeconomic footprint (from §12): 8(a): 2 families; HUBZone: 3 families; SDVOSB: 5 families; WOSB: 5 families; EDWOSB: 0 families (parent companies counted in §12).

Pricing evidence (supporting market research — never an Independent Government Estimate): Unknown / Insufficient evidence — GSA CALC returned no labor rates for NAICS 236220, so no rates are shown. Mindy does not estimate rates; the contracting officer owns the Independent Government Estimate.

b. Commerciality / FAR Part 12 determination: [To be completed — Phase 2]

c. Additional industry analysis: [To be completed — Phase 2]

d. Other: [To be completed — Phase 2]

Part 3 – Results of Market Research

16. Conclusions and Recommendations

[To be completed — Phase 2]

Summarize the analysis with recommendations for:

- Acquisition strategy (commercial acquisition, 8(a) direct, small business set-aside, sole source, full & open, HUBZone, etc.)
- Category Management opportunities and existing contract vehicles
- Improvements to the Government's technical/performance documents
- Relevant risks for source selection; specific terms & conditions
- OCI concerns; intellectual property considerations; GFM/GFE/GFI/GFP concerns

Part 4 – Signature Page(s)

All signature pages are separate from the body. This page is always required.
