Team Brief — Public Sector Partnerships & Government Sales

Date: June 14, 2026 · **From:** Eric · **Read time:** ~12 min **Purpose:** one-stop briefing — where we are, what's built, the strategy, and who does what.

This is the single source for tomorrow's brief. Deeper detail is linked at the bottom; you don't need it to be up to speed.

1. The one-paragraph version

We sell **Mindy** (our AI GovCon intelligence platform) to two kinds of buyers: **(A) organizations that serve contractors** — APEX Accelerators, SBDCs, economic development orgs (EDCs), minority- business councils — who license "Coach Mode" to help their clients; and **(B) government offices directly** — contracting and small-business offices that need Mindy's data to do their own jobs. Track A is the partnership/funnel play. **Track B is new, hot, and already has three warm government contacts with working prototypes.** We fund product R&D with non-dilutive grants on the side, but the revenue is software sales.

Two revenue lines: org/agency licenses (primary) + non-dilutive grants (fuel, not income).

2. Why we win — the wedge

Not "free alerts." Four things competitors don't offer, that our buyers must produce anyway:

1. **317K contractor profiles** — find/rank firms that have actually won the work (USASpending).
2. **PSC + NAICS relevance scoring** — match by *what was bought*, not just industry code, so we never miss a capable firm (accuracy: score, don't filter).
3. **Set-aside / small-business intelligence** — who's small, who's won set-aside work.
4. **DoD Critical Tech Area tagging + recompetes/expiry intelligence.**

Mantra: we take **reporting + matching + sourcing** dollars, not counseling dollars. We partner with APEX/SBDC, we don't replace them.

3. ⚡ The big development: 3 warm government contacts → 3 live prototypes

This is the headline for tomorrow. Each contact gave us a real need; we built and deployed a working prototype for each, **all on one demo account** (getmindy.ai/app → disa-demo@getmindy.ai).

Contact	Their need	What we built (LIVE)
DISA	Stop tracking IDIQ/IDV vehicles by hand; notify the incumbent before expiry	Vehicle Expiry Watch — upload the spreadsheet, auto-watch every expiry, auto-draft the incumbent notice (dry-run until they approve). DISA can get us in front of the KOs once verified.
Navy OSBP — Ashley Hodge, Deputy of Small Business Programs, Puget Sound Naval Shipyard	"Scaleable access to small businesses for contracting"	SMB Sourcing — search thousands of capable small businesses by PSC+NAICS, ranked by who's won the work, filter to small + set-aside, export. (She made the warm intro.)
Army MICC (contracting officer)	Acquisition market research — sent us the official Army MRR template	MRR Generator — auto-drafts the data sections of the official Army MAY-2026 Market Research Report from real award data, exports the .docx; brackets the CO's judgment sections.

The product story (repeat it): *one engine, real federal award data, three jobs.* The same PSC-scored search powers Navy sourcing AND the supplier/set-aside sections of the Army MRR; the award/recompete spine powers DISA's watch.

The honesty rule (why gov buyers trust it): every prototype does the heavy data work and is explicit about what it does NOT do — DISA sends nothing live until approved; OSBP shows "won set-aside work," not a faked cert; MICC brackets the IGE, commerciality determination, and signatures. **Never overclaim an authorization (ATO) we don't have.**

4. How we sell it — the strategy (the Anduril model)

We studied how Anduril started. The lesson (verified): they didn't avoid SBIR — they refused to be **grant-dependent**. Build a real product → sell it fixed-price as a commercial item to an end-user with a budget → use SBIR Phase III / OTA to *scale* a thing that already works.

That maps onto us. So:

TRACK 1 — SELL DIRECT (revenue now). The 3 warm contacts are BUYERS, not grant sponsors. They buy Mindy as a commercial-item subscription:

- Army MICC → micro-purchase (≤15K)*pilot* → *simplified acquisition*(≤350K). The KO can buy it.
- DISA → DITCO or the Tradewind marketplace.
- Navy OSBP → micro-purchase + NavalX Tech Bridge.
- **Pilot shape:** small (\$15K), 60–90 days, one team → land → expand to adjacent offices.

TRACK 2 — ONE SBIR for the strategic key (not income). Landing any one SBIR unlocks **uncapped, no-recompete Phase III sole-source across every agency** (the exact lever Anduril used). Vehicle: AFWERX Open Topic — needs an Air Force end-user (our 3 are Army/Navy, so we target an AF office like AFICC/AFLCMC). This is a parallel, longer play — not the near-term revenue.

The universal close (every gov conversation): don't ask for a contract — ask for their real codes/requirement + a **no-cost pilot on their data**.

5. Track A — the partnerships funnel (the original plan, still live)

Beyond the 3 direct gov contacts, the broader channel play (Phase 2 research is DONE — all targets verified with real contacts):

- EDCs with GovCon academies (P1: Prince George's County EDC, MD).
- **NMSDC councils** (best: CRMSDC — Sharon Pinder, runs a 12-week GovCon incubator).
- **State minority-business divisions** (TX HUB, MD GOSBA, CA DGS) — an UNDER-served "lead channel" (everyone fights at the federal door; state programs have captive certified-firm rosters).
- 🚫 **MBDA centers are NOT viable** right now (legal limbo, agreements expire Aug 31, 2026) — route to the surviving operators + state divisions instead.

Events to be in the room (book before year-end): ★ **NAPEX Aug 16–20, Orlando — \$1,500 govt booth** (APEX directors, cheapest + most on-target — top action); America's SBDC Sept 29–Oct 1, Atlanta. (MBDA MED Week is dead — don't budget.)

6. Funding (non-dilutive — fuel, not income)

- **2 assets:** we can apply through the **GovCon Giants nonprofit** (re-opens SBA/EDA/MBDA grants a for-profit can't win), and we've **held TX & FL state contracts** before (reactivate, not cold).
- **Near-term grant deadlines tracked:** DoD SBIR 26.3 (opens Jun 24), MBDA Rural Business Center (closes Jun 29). GAFC/PRIME — no FY26 NOFO yet (don't chase).
- The honest read: most federal "money" for us is **getting written into partners' grant budgets + the AFWERX Phase III key**, not winning competitive grants ourselves.

7. Who we need to bring on

- **FT Head of Public Sector Partnerships & Funding** (priority #1) — owns partnerships + grants; must be a credible insider (ex-APEX/SBDC/MBDA/CO), not a generic SaaS rep. Closes deals + writes applications. JD is written.
- **3 part-time regional advisors** (open doors, FT hire closes): APEX · SBDC/chamber · minority-business. Draft comp: \$500/qualified intro + 5% first-year license (*Eric approves before anyone signs*).

8. Who does what next (assignments for tomorrow)

Owner	Action
Eric	Run the 3 gov demos when scheduled (DISA verifying first); approve advisor comp; founder-level relationships
FT hire (when onboarded)	Own the gov pilots → commercial-item buys; the partnerships funnel; the grant calendar
Whoever runs ops	Book the NAPEX booth now (first-come, \$1,500); request the ASBDC prospectus
Product/Eric	Seed Ashley's real sourcing codes into the demo once she shares them; keep prototypes warm
All	Use the demo playbook verbatim; honesty rule on every gov call; pilot-not-contract close

This week's must-dos: (1) book NAPEX, (2) DISA verification → KO meeting, (3) send the PGC EDC outreach, (4) DoD SBIR 26.3 / MBDA Rural BC deadline calls.

9. The 6-month scoreboard

3 signed pilots/evals · 1 paid license · 10+ NAPEX director meetings · 2 post-NAPEX pilots · 2 grant applications submitted · all 3 gov prototypes converted to paid pilots.

Questions → Eric.

Brief prepared June 14, 2026. All 3 prototypes live on getmindy.ai (demo account). Everything committed + pushed.

Government Demo Playbook — 3 Warm Contacts, 3 Prototypes

The state of play: three warm government contacts, each with a stated need, each with a working prototype live on the demo account. This is the index — open the specific runbook before each demo.

Demo account (all three): <https://getmindy.ai/app> → disa-demo@getmindy.ai / DisaDemo!2026

The three

Contact	Need (their words)	Prototype	Panel	Runbook
DISA	Research expiring contracts — stop tracking IDIQ/IDV by hand	Vehicle Expiry Watch — auto-notify the incumbent at 6mo/90d/30d	"Vehicle Expiry Watch"	DISA-DEMO-PITCH-RUNBOOK.md
Navy OSBP — Ashley Hodge (PSNS&IMF)	Scaleable access to small businesses for contracting	SMB Sourcing — PSC-scored capable small businesses, exportable	"SMB Market Research"	OSBP-DEMO-PITCH-RUNBOOK.md
Army MICC (KO)	Acquisition market research (sent the official MRR template)	MRR generator — auto-drafts the Army MAY-2026 MRR .docx	"Market Research Report"	MICC-DEMO-PITCH-RUNBOOK.md

The product story (use across all three)

One engine, three jobs. The PSC-scored capable-business search powers:

- Navy OSBP sourcing (find the firms)
- §11/§12 of the Army MRR (document the firms + set-aside rec)
- and the recompetes/award spine powers DISA's expiry watch.

Pitch line: "Same source of truth — real federal award data — whether you're sourcing small businesses, documenting a market research report, or tracking expiring vehicles."

The honesty rule (every demo)

Each prototype does the data-heavy work and is **explicit about what it doesn't do**:

- DISA: dry-run — nothing emails a vendor until they approve the voice + list.
- OSBP: "won set-aside work" signal, not a live cert pull (yet); national ranking, region next.
- MICC: fills research/data sections; brackets the IGE, commerciality determination, signatures.

A government buyer trusts the tool *because* it's honest about its edges. Never overclaim an ATO.

Universal close

Don't ask for a contract. Ask for: **their real codes/requirement + permission to run a pilot on their data** (no cost). Land the pilot → expand. (The Anduril move: solve the real problem, small, then grow.)

Strategy context

- GOVT-GTM-STRATEGY.md — these are Track 1 (sell direct via commercial-item pilots = revenue now); one AFWERX SBIR later for the Phase III key.
- Direct-buy paths (per contact): MICC → micro-purchase \$15K → SAT \$350K; DISA → DITCO/Tradewind; Navy OSBP → micro/SAT + NavalX Tech Bridge.

Created June 14, 2026.

DISA Demo — Step-by-Step Pitch Runbook

For: Eric, demoing the Vehicle Expiry Watch prototype to DISA KOs **Goal:** Prove the prototype solves their manual IDIQ/IDV tracking → earn the next step (a pilot) **Length:** 10–12 minutes. **Tone:** "I built the thing you described. Let me show you."

The whole demo is **dry-run** — nothing gets emailed to anyone. Say that early; it removes fear.

PRE-FLIGHT (do this 15 min before the call)

- ☐ **Log in works.** Go to <https://getmindy.ai/app> → sign in: **disa-demo@getmindy.ai / DisaDemo!2026** (if 2FA prompts, it's optional — skip/continue).
- ☐ **Open the panel:** left sidebar → "Vehicle Expiry Watch" (Bell icon, under Expiring Contracts).
- ☐ **Confirm the dashboard shows data** — should read ~8 vehicles watched · 6 expiring ≤6 months. (If empty, the demo data didn't load — text whoever set it up; do NOT demo an empty screen.)
- ☐ **Pre-click "Preview notices" once** so you've seen today's output and nothing surprises you.
- ☐ Have the **sample CSV** handy (`disa-demo-vehicles.csv`) in case you want to re-show the upload.
- ☐ Close other tabs / silence notifications. Share the **single browser tab**, not your whole screen.
- ☐ **One-line reset if needed:** if the data looks wrong, re-run `npx tsx scripts/provision-disa-demo.cjs` (reloads the 8 vehicles).

THE PITCH (follow in order)

STEP 0 — Frame it (30 sec, before sharing screen)

"You told me your team tracks every IDIQ and IDV vehicle by hand in spreadsheets, and when one gets close to expiring you manually figure out who holds it and notify them. I built a working prototype that does that automatically. It's a dry run today — nothing actually emails anyone — so we can look at it safely. Let me share my screen."

Why: sets the before/after and disarms the "are you about to email my vendors?" fear immediately.

STEP 1 — "This is your spreadsheet, now automated" (2 min)

Do: Share the tab showing the **Vehicle Expiry Watch dashboard** (already loaded). **Point to the summary cards, top to bottom:**

"Eight vehicles being watched — this is the spreadsheet, except it updates itself. Six are expiring within six months. Three are inside ninety days. And it's already flagged one vehicle that's **missing an incumbent email** — so you know exactly what's incomplete."

Then scroll the table:

"Every vehicle, sorted by what's expiring soonest. Each shows the incumbent, the expiration date, a live countdown, the ceiling value, and which notification stage it's in — six months, ninety days, thirty days."

Why it lands: they recognize their own spreadsheet — but it's watching the dates *for* them.

STEP 2 — The payoff: "Preview notices" (3 min) ← the moment

Do: Click "**Preview notices.**" **Say:**

"Here's the part that replaces the manual work. The system already knows which incumbents are due for a notice today, and it's **written the email for each one**. This is exactly what your team types by hand, every time — done automatically."

Walk ONE notice end to end (pick a 90-day / red one):

"This vehicle, HC1028..., expires in [X] days. Here's the notice ready to go to the incumbent — the contract number, the expiration date, the days remaining, and the recompetete heads-up. Your team didn't write a word of this."

Then the honesty moment — point to the blocked one:

"And notice this one is **blocked** — Beacon Telecom — because there's no incumbent email on file. The system won't guess or send to the wrong place. It tells you exactly what to fix. That's the difference between a real tool and a demo."

Reinforce the dry-run:

"Nothing here has been sent. The big DRY RUN badge means this is preview-only. When you're ready, *you* decide the wording and approve the list before a single email goes out."

The leave-behind (do this — it's tangible): click "**Download notice (.docx)**" on one card.

"And each notice generates as a clean Word document — here. This is something your team can drop into your existing process today, even before any automation. I'll send you a couple of these from your real vehicles after this call."

A KO walking away with an actual editable .docx in DISA format is worth more than any slide.

Why it lands: they SEE the manual work eliminated, AND you've shown the tool is honest about its own gaps — which is what earns a contracting officer's trust.

STEP 3 — "And it started from your spreadsheet" (1.5 min) — optional but strong

Do: Scroll up to the **Upload CSV** box. (Optionally upload `disa-demo-vehicles.csv` live.) **Say:**

"Setup is one step: you upload the spreadsheet you already keep. It reads your columns — contract number, incumbent, email, expiration — and starts watching. No new system to learn, no data re-entry. You hand it what you've got."

Why: kills the #1 objection ("we don't have time to set up another tool").

STEP 4 — The close (1 min)

"That's the prototype — built specifically around what you described. Two quick questions so I can make it exactly right for DISA:

1. When a vehicle nears expiration, do you want the system to **email the incumbent directly**, or **draft the notice for your team to send**?
2. What should that notice actually **say** — a courtesy heads-up, a recompetete prompt, a sources-sought nudge?

Give me those two answers and a sample of your real vehicle list, and I'll have a version running on your actual data for a small pilot. No cost to look."

The ask: a follow-up working session + their real vehicle spreadsheet. NOT a contract today.

ANTICIPATED QUESTIONS (have these ready)

They ask...

You say...

"Is this sending emails to my vendors right now?"

"No — everything is dry-run. It previews what *would* send. Live sending only turns on after you approve the wording and the list."

"Where does the contract data come from?"

"Two ways: you upload your vehicle spreadsheet (it has the incumbent contact email), and we can auto-enrich the rest — ceiling, expiry, recipient — from public USASpending data. Your spreadsheet is the source of truth."

"How does it know who the incumbent is / their email?"

"From your spreadsheet — that's the one thing public data doesn't have. We fill in everything around it automatically."

"Is this approved / authorized to use?"

"It's a prototype on commercial infrastructure — I built it to show you the concept works. Standing it up for real DISA use is exactly what a pilot would scope, including any IT/security review on your side." (*Be honest — don't overclaim an ATO you don't have.*)

"What does it cost?"

"The pilot is no-cost to evaluate. If it works and you want it in production, it's a simple commercial software subscription — your office can buy it directly, no big acquisition."

They ask...

You say...

"Can it do [X other thing]?"

"Today it does expiry-watch + incumbent notification, because that's the problem you raised. It's built on a platform that also does market research, incumbent analysis, and recompute intel — so yes, that's a natural next step. Let's nail this first."

"We have a system that does this."

"Great — does it write and queue the notices automatically, or does your team still do that part? That's the gap I'm solving."

DON'T

- **Don't claim it's sending live** — it's dry-run; say so.
- **Don't overclaim authorization/ATO/FedRAMP** — it's a prototype; be straight, frame production as the pilot's job.
- **Don't demo an empty screen** — verify data loaded in pre-flight.
- **Don't pitch the whole platform** — this demo is the wedge (the one problem they have). Expansion comes after.
- **Don't ask for a contract** — ask for their real vehicle list + the two answers (send direct vs. draft; notice voice).

THE ONE-LINE TAKEAWAY (if they remember nothing else)

"You hand it your vehicle spreadsheet, and it watches every expiration and writes the incumbent notices for you — automatically, with your approval before anything sends."

Reference

- **URL:** <https://getmindy.ai/app> · **Login:** disa-demo@getmindy.ai / DisaDemo!2026
- **Panel:** sidebar → "Vehicle Expiry Watch"
- **Sample data:** `disa-demo-vehicles.csv` · **Reload:** `npx tsx scripts/provision-disa-demo.cjs`
- **The two open decisions** (from DISA-VEHICLE-WATCH-SPEC.md): direct-send vs. draft · notice voice
- **Bigger strategy context:** GOVT-GTM-STRATEGY.md (this is Track 1 — sell direct; land DISA, expand)

Created June 14, 2026.

Navy OSBP Demo — Step-by-Step Pitch Runbook

For: Eric, demoing the SMB Sourcing prototype to **Ashley Hodge** (Deputy of Small Business Programs, Puget Sound Naval Shipyard & IMF — PSNS&IMF, Bremerton WA) and her network. **Her stated need (her words):** *"scaleable access to small businesses for contracting."* **Goal:** prove Mindy finds capable small businesses at scale → earn a pilot / wider intro. **Length:** 8–10 min. **Tone:** "You said you need to find more small businesses. Watch this."

Ashley made the intro to you via Keidra Norwood — she's the warmest contact. This demo should feel like you built exactly what she asked for (you did).

PRE-FLIGHT (15 min before)

- ☐ Log in: <https://getmindy.ai/app> → `disa-demo@getmindy.ai` / DisaDemo!2026 (shared demo acct).
- ☐ Sidebar → "SMB Market Research".
- ☐ **Pre-run her search:** PSC J998 (Non-Nuclear Ship Repair – East) + NAICS 336611 → confirm it returns **thousands** of firms (≈4,594) with real ship-repair names up top. This is HER world (PSNS&IMF = ship repair) — that's why it lands.
- ☐ Try the **≤\$25M** ceiling + the **set-aside-only** toggle once so you know the live behavior.
- ☐ Share one browser tab. Silence notifications.
- ☐ Reset if needed: data is live (USASpending) — nothing to reseed.

THE PITCH

STEP 0 — Frame (30 sec, before sharing)

"When we talked, you said the hard part is getting scaleable access to small businesses you can actually contract with. So I'll show you exactly that — every small business that has *won* the kind of work you buy, ranked by how well they match, exportable to a list. Let me share my screen."

STEP 1 — Search the work, not just the code (2 min)

Do: Type PSC **J998** (or whatever she buys) + NAICS **336611** → "Find businesses." **Say:**

"I'm searching by PSC — the actual product or service, ship repair — not just the industry code. That matters: a firm that's done the *work* is a real match even if they're registered under a slightly different NAICS. So we don't miss anyone."

When results land (~4,594):

"Thousands of capable firms — not a 10-row sample. Every one has won federal work, ranked by relevance: the green ones won this exact service, then related work, then the industry."

STEP 2 — "Capable AND small" (2 min) ← her core need

Do: Set the ≤ \$25M ceiling, check "set-aside winners only." **Say:**

"Now I bias it toward genuinely small firms — under a federal-dollar ceiling — and to the ones that have actually *won small-business set-aside work*. That's your sourcing pool: small, certified-active, and proven. Each row shows why it matched and its track record."

Point at a row:

"This firm — won the exact work, set-aside winner, [X] contracts. That's a defensible source for your market research, not a guess."

STEP 3 — The export (1 min)

Do: Click "Export to CSV."

"And it's a list you can drop straight into your market research file or hand to a CO. The sourcing that used to take days of SAM and Google is one search."

STEP 4 — The bigger picture (1 min) — optional

"This same engine feeds the contracting officer's Market Research Report — the supplier and set-aside sections write themselves from this data. So whether it's you sourcing or a CO documenting, it's the same source of truth."

STEP 5 — Close (1 min)

"Two questions so I tailor it to PSNS&IMF:

1. What are the top few PSCs / NAICS you source against most? I'll pre-load them.
2. Would it help to also see *where* these firms are (region), and to filter to a size standard?

Give me your real sourcing codes and I'll set this up on your data for a pilot — no cost to look."

The ask: her real PSC/NAICS sourcing codes + permission to set up a pilot view.

ANTICIPATED QUESTIONS

She asks...

You say...

"Is this just SAM?"

"No — it's the full federal *award* history (317K firms), so you see who actually *WON* the work, with their track record. SAM tells you who's registered; this tells you who's capable."

"Can I filter to small businesses only?"

"Yes — the dollar-ceiling biases to small firms, and the set-aside toggle shows who's won set-aside work. (Exhaustive SBA-size-standard filtering is the natural next step if you want it.)"

"Does it show certifications (8a/WOSB...)"

"It flags firms that have *won* set-aside work today — a proven signal. Pulling each firm's live SAM cert is a quick add if you need the formal cert on the list."

"Why does it cap at ~50 on screen?"

"That's the page — there are thousands; 'Load more' pages through them, and export gives you the set."

"How current is it?"

"Federal award data, refreshed regularly. Each result is real obligations, not a directory listing."

"Location? I need Pacific NW firms."

"Today it ranks nationally by who's done the work; region filtering is the obvious next add — flagged honestly. For now, the firm's profile shows location."

DON'T

- Don't claim live SAM cert filtering for SDVOSB/WOSB — it's a "won set-aside work" signal (honest).
- Don't overstate location filtering — it's national-ranked today; say region is next.
- Don't pitch the whole platform — her need is *sourcing*. Land that.

✓ ONE-LINE TAKEAWAY

"Every small business that's actually won the work you buy — ranked, exportable, in one search."

- Best demo query: PSC **J998** + NAICS **336611** (ship repair — Ashley's domain)
- Contact: Ashley Hodge, ashley.n.hodge6.civ@us.navy.mil, (360) 979-3423 · intro via Keidra Norwood
- Honest gaps (say if asked): live cert filter + region filter + SBA size standard = next adds
- Shared engine: this powers §11/§12 of the Army MRR too (MICC-DEMO-PITCH-RUNBOOK.md)

Created June 14, 2026.

Army MICC Demo — Step-by-Step Pitch Runbook

For: Eric, demoing the Market Research Report (MRR) generator to the **Army MICC** contracting officer (the contact who sent the official MRR template). **His stated need:** acquisition market research — and he handed you the exact form (the Army **MAY-2026 MRR template**, post-FAR-Overhaul). We match it. **Goal:** prove Mindy drafts the data-heavy 80% of his MRR → earn a pilot on a real requirement. **Length:** 10 min. **Tone:** "You sent me your template. I taught Mindy to fill it out."

A CO trusts a tool that does the tedious data work AND is honest about the parts only they can do. Lead with "your template," win with the auto-filled tables, close with the honesty.

PRE-FLIGHT (15 min before)

- ☐ Log in: <https://getmindy.ai/app> → disa-demo@getmindy.ai / DisaDemo!2026.
 - ☐ Sidebar → "**Market Research Report.**"
 - ☐ **Pre-run a demo:** Title "Non-Nuclear Ship Repair", PSC **J998**, NAICS **336611**, keyword "ship repair" → "Generate MRR draft." Confirm the stat cards + §9 history + §12 recommendation populate (≈\$5B market, 15 prior contracts, "Small business set-aside").
 - ☐ **Pre-download the .docx once** and open it in Word — so you can show the actual document, and so nothing surprises you. (Pick a PSC/NAICS in HIS domain if you know it — even better.)
 - ☐ Have the official template PDF handy (docs/Market Research Report Template (MAY 2026).pdf) to show "this is YOUR form."
 - ☐ Share one tab. Silence notifications.
-

THE PITCH

STEP 0 — Frame (30 sec)

"You sent me the Army Market Research Report template — the May 2026 version. I built Mindy to fill out the data-heavy sections of *that exact form* from real federal award data, so you get a first draft instead of starting from a blank 16-page document. It won't write your judgment calls — and I'll show you exactly where it stops. Let me share."

STEP 1 — "Your form, one input" (1.5 min)

Do: Show the panel; type the requirement title + PSC + NAICS.

"I give it what I'm buying — the PSC and NAICS — and the requirement title. That's it." **Click "Generate MRR draft."**

STEP 2 — The market picture, instantly (2 min)

Do: Point at the stat cards + the §12 recommendation.

"In a few seconds: the supplier pool, how many are small businesses, how many have won set-aside work, and the prior contracts. And here's the §12 recommendation — 'Small business set-aside' — with the rationale: it found [N] capable small businesses, which meets the FAR Part 19 rule of two. That's your set-aside determination, grounded in real data."

STEP 3 — The auto-filled tables (2.5 min) ← the payoff

Do: Scroll the §9 Procurement History preview.

"§9 Procurement History — the prior contracts: who won, contract type, dollars, period. This is the table you normally pull by hand from FPDS. It's already built." **Then mention §11:** "And §11 Potential Suppliers is filled with capable firms, ranked by who's actually done this work — same engine the small-business office uses for sourcing."

STEP 4 — The actual Word document (2 min) ← the close-maker

Do: Click "Download MRR (.docx)", open it in Word on screen.

"And it exports as *your* template — the real MRR layout, with §5, §9, §11, §12, §15 filled in and sourced to USASpending. You open it in Word and finish it."

STEP 5 — The honesty (1 min) ← what earns a CO's trust

Do: Point at the amber "you complete these sections" box.

"Here's what Mindy does NOT do — and I want to be straight about this: your Independent Government Estimate, the commerciality determination, the requirement description, the signatures. Those are your judgment and your authority. Mindy does the research; you make the determinations. It brackets every one of those so nothing's faked in your contract file."

STEP 6 — Close (1 min)

"So this turns days of market research into a draft you finish in an hour. Two things to make it real for your shop:

1. Give me a live requirement — a PSC/NAICS you're working now — and I'll generate its MRR.
2. Is the May 2026 template the current one MICC uses, or do you have local addenda? I'll match it.

Then we run it on a real action as a pilot — no cost."

The ask: a real PSC/NAICS to run live + confirmation of the current template version.

ANTICIPATED QUESTIONS

He asks...

"Where's the data from?"

"Does it write the whole determination?"

"Is this authorized / can it go in my contract file?"

"It used the wrong NAICS / set-aside."

"Does it handle the IGE?"

"What about the RFA / non-commercial determination?"

You say...

"USASpending federal award data — every figure is real obligations, dated. The supplier and history tables cite the source."

"No — and that's deliberate. It fills the research/data sections; you write the IGE, commerciality determination, and sign. It never fabricates a determination."

"It produces a draft you review, complete, and certify — same as any tool-assisted research. What goes in the file is your finished, signed document. Standing it up for MICC use, with any IT review, is what a pilot scopes."

"You control the inputs — change the PSC/NAICS and regenerate. The recommendation follows the real data; if you disagree, your judgment overrides, and the doc is yours to edit."

"No — the IGE is your cost estimate; it's bracketed for you to insert. It's not something a market tool should invent."

"Bracketed for you — that's a legal/policy call. Mindy gives you the market research that *supports* it."

DON'T

- Don't claim it writes the IGE, commerciality determination, or any signature — those are bracketed.
- Don't claim an ATO/authorization it doesn't have — frame production as the pilot's job.
- Don't demo a blank result — pre-run a populated PSC/NAICS.
- Don't pitch the platform — this is *his* MRR, the one form he sent.

ONE-LINE TAKEAWAY

"You sent me your MRR template — Mindy fills the data sections from real award data and hands you the Word doc to finish."

- Best demo query: title "Non-Nuclear Ship Repair", PSC **J998**, NAICS **336611**, keyword "ship repair"
- The template he sent: docs/Market Research Report Template (MAY 2026).pdf

- Auto-filled: §5, §9, §11, §12, §15 · Bracketed (CO completes): §1–4 (incl IGE), §6–8, §10, §13, §14, signatures
- Shared engine: §11/§12 are the same capable-business search as the Navy OSBP tool

Created June 14, 2026.

Government GTM Strategy — Direct Sales + the SBIR Phase III Key

Owner: Eric → FT Head of Partnerships & Funding **Status:** Strategy — June 14, 2026 **Supersedes the "SBIR-first" framing in:** FUNDING-STRATEGY.md, AFWERX-SBIR-READINESS.md **Built from:** 3 warm govt contacts + per-component SBIR research + AF end-user research + the Anduril playbook

The big correction (read this first — it saves months and money)

We started thinking "win an SBIR to fund Mindy." The research says that's the **wrong instrument for our 3 warm contacts** — and the Anduril story shows why.

SBIR funds R&D you haven't done yet. Mindy already exists and works. Our three contacts (Army MICC KO, DISA, Navy OSBP) are **acquisition / small-business people who can simply BUY a commercial tool** — none of them is an SBIR topic sponsor. Trying to route them through SBIR is solving a problem we don't have.

The Anduril lesson (accurately): Anduril did NOT avoid SBIR — its entire border business runs on an **SBIR Phase III IDIQ** (FPDS 70B02C20D00000019, ~\$2B ceiling). What they refused was being **grant-DEPENDENT**. The model:

Build a real product with your own capital → sell it **fixed-price as a commercial item** to an end-user with a budget and real pain → use **SBIR Phase III / OTA as the VEHICLE to scale** a thing that already works — not as the reason it exists.

That maps onto us 1:1: Mindy is built; we have 3 end-users with budgets; the fast money is a direct buy; SBIR's real prize is the **Phase III sole-source door**.

The two-track strategy

● TRACK 1 — SELL DIRECT (now; this is the revenue)

The three warm contacts buy Mindy as a **commercial-item subscription** — fast, no competition, they can execute it themselves.

Contact	Need	Buy path (post-Oct-2025 thresholds)
Army MICC (KO)	acquisition market research	Micro-purchase ≤15K * *pilot(purchasecard, nocompetition) → * * SimplifiedAcquisition≤350K to scale. The KO executes this directly.
DISA	research expiring contracts	DITCO commercial buy (FAR Part 12) or the Tradewind AI marketplace (CDAO, DoD-wide). DISA issues no SBIR topics — this was always a direct buy.
Navy OSBP	SMB market research	Micro-purchase / SAT commercial buy + NavalX Tech Bridge as the warm channel.

Pilot structure (Anduril's CBP arc, scaled down): land a small **\$15K, 60–90 day, single-team pilot** → deliver → expand to adjacent offices. Land-and-expand, not a moonshot.

Accelerant: if Mindy/GovCon Giants holds any **8(a)/SDVOSB/WOSB/HUBZone** cert → **sole-source set-aside up to \$5.5M services**. (Confirm what certs we hold.)

● TRACK 2 — ONE SBIR for the PHASE III KEY (strategic, not for income)

Do **one** SBIR — not to get paid to build, but because landing any single SBIR unlocks the **uncapped, no-recompete Phase III sole-source pathway across EVERY agency** (15 U.S.C. §638(r)(4)). That's the single most capital-efficient path to real contracts for a small firm — exactly the lever Anduril used for border towers.

- **Vehicle: AFWERX Open Topic** (the truest tech-agnostic open topic in FY26; Army is narrowing, Navy is scoped, DISA has none).
- **Requires a DAF (Air/Space Force) end-user** — our 3 contacts are Army/Navy/Joint, so we need an **AF use case + AF customer** (see AF targets below).
- **Reframe the pitch toward a DAF mission** (the dual-use story): not "help vendors win bids" but **defense industrial-base mapping / supplier-risk + foreign-influence analytics / acquisition- portfolio analytics for COs & PEOs** — which also rides DoD's new foreign-adversary-vetting priority.
- **Precedent that AFWERX funds this category** (the case studies):
 - **Eudia** — \$1.25M AFWERX D2P2, AI for DAF **procurement transformation / contract review**
 - **Oliver Wyman** — SSC SBIR Phase III **business-intelligence tool** (\$1.1M)

- **Outside Analytics "DAVE"** — \$215M AF SBIR Phase III analytics/visualization ecosystem
- **Certus Core** — AFWERX open topic, pure-software **knowledge-graph datastore**
- → Mindy sits squarely inside a proven AFWERX funding lane.

AF / Space Force end-user targets (for Track 2)

For a market-research/recompete analytics tool, **the acquisition workforce IS both the end-user and the customer** — COs, small-business specialists, market-research analysts. Clean fit; no separate "warfighter" needed.

Target	Why it fits	Approach
★ AFICC — Enterprise Solutions Support Directorate (KA) / Acquisition Center of Excellence	The only candidate with a named unit whose job is "market research + contract strategy" across a huge recurring contract base = our market-research + recompete value prop exactly	Best single AFWERX customer. Anchor Customer here. [afimsc.af.mil]
AFLCMC Small Business Office (Wright-Patt)	Their public workflow is literally NAICS → market research → UEI → capability = Mindy 1:1; co-located w/ AFRL/AFWERX	Strong backup; zero-translation pitch. [afimsc.af.mil/Small-Business-Office]
SSC Small Business Office + SpaceWERX (El Segundo)	Space industrial base scaling → supplier mapping need; SpaceWERX = co-located funder	The Space angle (end-user SSC SBO + funder SpaceWERX)
AFRL Small Business Office	Mandate to "expand the industrial base" + acquisition-strategy role; houses AFWERX (culturally pre-sold)	Warm, innovation-friendly
SAF/SB (DAF Office of Small Business Programs)	Secretariat-level; vision = "enhance the industrial base" + "deliver capability to decision-makers"	Top-cover endorser , not the fast signer

The DAF use-case anchor (documented demand): GAO + the Defense Business Board's 2025 "Supply Chain Illumination" push + the Space Force Acquisition Council's industrial-base survey all show real demand for **industrial-base visibility** and faster market research. Anchor sentence:

"DAF small-business and contracting offices do NAICS-by-NAICS market research and recompete planning manually; Mindy gives instant industrial-base visibility (317K contractors, UEI win attribution) + an expiring-contract early-warning layer — the supply-chain illumination DoD is already buying, applied to the small-business sourcing and recompete workflow."

Per-contact / per-target decision table

Who	Vehicle	Why
Army MICC KO	Direct buy (micro → SAT)	KO is a buyer, not an SBIR sponsor; Army open topic narrowing
DISA	Direct buy (DITCO / Tradewind)	DISA issues no SBIR topics; "research expiring contracts" = internal-tool buy
Navy OSBP	Direct buy + NavalX Tech Bridge	OSBP is a buyer/advocate, not a topic sponsor
AFICC / AFLCMC (new AF target)	AFWERX SBIR → Phase III key	The one SBIR worth doing — for the Phase III sole-source unlock

What's transferable from Anduril (honest)

Copy the sales motion, not the funding model.

✅ Transfers: sell to one end-user with a budget + painful problem; pilot→expand; position as a commercial-item subscription (FAR Part 12); lead with a working product + speed; use SBIR as a *bridge* to Phase III sole-source, not as the business; use free channels (APEX, SBA, DIU/AFWERX, NavalX) as our "lobbying" substitute.

❌ Doesn't transfer (these are Anduril's starting conditions, not tactics): self-funding speculative R&D at \$1B scale; hardware moat + cinematic demos; paid lobbying from day one; a built-in launch customer + founder's VC network. **Plan as if we have none of their advantages** — which makes the direct-pilot path even more important (it's the one we can actually run).

Sequence

1. **Now:** capture the 3 contacts' names/emails/exact needs → discovery calls → propose a **\$15K 60–90 day pilot** to each (Track 1). This is the revenue + the proof points.
2. **Confirm our small-business certs** (8(a)/SDVOSB/WOSB/HUBZone) → unlocks set-aside sole-source.
3. **In parallel:** approach **AFICC/KA or AFLCMC SBO** as the AF end-user for the **one AFWERX SBIR** (Track 2) — reframed around industrial-base visibility. NAPEX (Aug) = the room to meet them.

4. Land the first pilot → expand to adjacent offices (Anduril's land-and-expand).
5. Win one SBIR → unlock Phase III sole-source → scale across agencies without recompet.

Open items

- ☐ Capture the 3 contacts (name/email/need) + book discovery calls
- ☐ Draft a **commercial-item pilot proposal** (\$15K, 60–90 day) — reusable across all 3
- ☐ Confirm what small-business certs Mindy / GovCon Giants holds
- ☐ Approach AFICC/KA (or AFLCMC SBO) as the AFWERX AF end-user; reframe pitch to DIB visibility
- ☐ Confirm next AFWERX Open Topic window on DSIP
- ☐ (Stale-threshold note for all future GovCon work: micro-purchase = **15K** * *, **SAT** = ****350K** as of Oct 1 2025 — the older 10K/250K figures are wrong.)

Sources (verified)

- Anduril: SBIR Phase III IDIQ [70B02C20D00000019](#) · [Contrary Research](#) · [Renegades transcript](#) · [DIU \\$99M OTA](#) · [OTA statute 10 USC §4021](#) · [Phase III sole-source](#)
- AF targets: [AFLCMC SBO](#) · [SAF/SB](#) · [AFICC fact sheet](#) · [SpaceWERX](#)
- Case studies: [Eudia AFWERX D2P2](#) · [DAVE \\$215M](#) · [Oliver Wyman SSC BI tool](#)
- SBIR reauth: [Crowell](#)

Created June 14, 2026. Core thesis: Mindy is built → SELL DIRECT to the 3 warm end-users (commercial- item pilots = revenue now), and do ONE AFWERX SBIR (with an AF end-user) for the Phase III sole-source KEY — the Anduril move: build first, sell fixed-price, use SBIR as the scaling vehicle, never be grant-dependent.

Funding Strategy — Non-Dilutive Capital for Mindy

Owner: Eric → FT Head of Public Sector Partnerships & Funding **Status:** Research complete — June 14, 2026 **Companion to:** grant-nofotracker.md (live deadlines), PRD §6, apex-sbdc-funding-strategy/funding-levers-research.md (how our CUSTOMERS' funding works)
Rule: Every program below is assessed from real sources. Fit verdicts are honest — "Poor / Not eligible" is a useful answer that saves wasted applications.

This doc answers: which funding can MINDY actually win, and is it worth the effort? The tracker has deadlines; this has the strategy, fit, and apply/skip calls behind them.

0. TL;DR — the honest read

After researching DoD SBIR, civilian grants, and 5 states, the funding landscape sorts into **three buckets**:

● WORTH REAL EFFORT (apply):

1. AFWERX SBIR Open Topic (DoD/Air Force) — the best federal fit. Dual-use software-friendly, low-dollar feasibility gate. **Win hinges on lining up a government end-user (Customer Memorandum), not the tech.**
2. NSF SBIR/STTR Phase I (NSF 26–510, up to **\$305K**, deadlines **Jul 27 & Nov 4, 2026**) — only civilian direct-apply fit for a for-profit SaaS. **Conditional on a genuine deep-tech research question** (novel matching/win-prediction methods), not "a better tool."

● **PROVEN / HIGH-CONFIDENCE (we've done it):** 3. **TX + FL state vendor — reactivate.** We've held state contracts in both → past performance + likely-active registration. FL OSD + TX DIR are the best-fit states *and* the ones we already know. Lowest-effort, highest-realism money on the board.

● **NOW IN PLAY via the GovCon Giants NONPROFIT (was ●):** 4. **SBA GAFC + PRIME, EDA, MBDA center NOFOs** — these fund nonprofits, so we **apply through GovCon Giants → license Mindy as the platform.** Either way (we apply, or a partner does), get Mindy **written into the grant budget as the software line item.**

● **SKIP (not eligible / off-mission / dilutive):** 5. NIST MEP (awardee-restricted), Treasury SSBCI (dilutive debt/equity), NTIA (off-mission).

Single structural truth: SBIR funds tech the **government uses**; Mindy's natural buyer is the **vendor side**. The credible bridge for every federal R&D pitch = the **OSBP / DIB-visibility angle** — give a government office visibility into small-business participation across the 14 Critical Technology Areas. That's a government end-user story.

⚡ Two assets that change the math (Eric, Jun 14)

These weren't in the initial research and they materially upgrade the plan:

1. **GovCon Giants is a NONPROFIT entity we can apply through.** The #1 disqualifier in the research below was "*for-profit SaaS not eligible*" — it killed SBA PRIME, GAFC, EDA, and MBDA-center NOFOs. **Applying through the GovCon Giants nonprofit flips a whole 📍 SKIP tier to ELIGIBLE.** The structure: nonprofit applies/operates the program (eligible) → licenses Mindy as the platform (revenue to the SaaS). This is the single most valuable funding asset we have. (*Confirm with counsel: nonprofit-applicant + for-profit-affiliate-vendor arrangements need a clean related-party/procurement story — but it's a well-trodden model.*)
2. **We've already held TX and FL STATE CONTRACTS.** We are not a cold vendor — we have **past performance + likely-active registration** in the exact two states with the best vendor fit (TX DIR / FL OSD). State-vendor isn't a "discovery" path; it's a **reactivation** path. Becoming a state vendor where required is a no-brainer — we've done it.

1. DoD SBIR/STTR — the primary R&D path

1.1 Program structure (verified, 2026)

- **Reauthorized Apr 13, 2026** (after a ~6-month lapse) through **Sep 30, 2031**. New "Strategic Breakthrough Phase II" added.
- **Monthly BAA cadence.** Each release: pre-release → open → close (~1 month each). Topics + submission via **DSIP** — dodsbirsttr.mil/topics-app/.
- **Note:** 2026 docs now carry "Department of War (DoW)" branding. "26.3" = **FY26 Release 3**: opens **Jun 24**, closes **Jul 22, 2026**.

Release	Opens	Closes
FY26 R3	Jun 24, 2026	Jul 22, 2026
R4	Jul 22	Aug 19
R5	Aug 26	Sep 23
R6	Sep 23	Oct 21

1.2 Real topics that fit Mindy (verified topic numbers — prove demand; target the next recurrence)

Topic	# / Solicitation	Component	Fit	Status
Resilient Supply Chain Autonomous Intelligence Assistant	11887 / 25.B (STTR)	Air Force	★ Near-exact: DIB supply-chain platform, open-source data extraction + entity disambiguation in a knowledge graph = Mindy's contractor-data + UEI engine	CLOSED (recurs)
Scalability for Knowledge Graphs for Enterprise	25.D (STTR)	Air Force	Same family — heterogeneous data ingestion + analytics for DIB	CLOSED (recurs)
AI-enabled Portfolio Management (acquisition decision-support)	A254-023 / 25.4.5 (D2P2 up to \$2M)	Army	Adjacent — opportunity→requirement matching	CLOSED; was xTechIgnite-gated
AFWERX SBIR Phase I Open Topic	recurring (26.1 closed Mar 6 2026)	Air Force	★ Best structural fit — propose any dual-use tech w/ an AF use case	Rekurs monthly

Phase III precedent (the money is real): Small Business Consulting Corp. won a **\$60M AF Phase III IDIQ** for "Commercial Engagement and Integration — **Rapid Acquisition Decision Support**" — the closest existing program-of-record to what Mindy does.

1.3 Best-fit component — AFWERX Open Topic (DAF)

Why it's the entry point:

- **Topic-agnostic + explicitly dual-use** — you don't need a matching topic to exist, you need an Air Force end-user.
- **Friendliest to commercial software with no defense pedigree** — the Phase I deliverable is essentially a signed **Customer Memorandum** (proof an AF office would use it), not building hardware.
- Runs across multiple monthly releases → flexible timing.

1.4 Award sizes + honest win odds

Path	Phase I \$	Timeline	Honest win read
AFWERX Open Topic Phase I	up to \$75K (SBIR) / \$110K (STTR)	~3 mo	Winnable on first try IF an end-user signs a Customer Memorandum. Without one, coin-flip. The bar is relationship work, not tech.
Standard DoD specific topic (cold)	50K–250K	3–6 mo	Low (~10–20%) for a no-prior-SBIR software firm vs. prior performers
Phase II / D2P2	up to ~1.25M–2M	~18–21 mo	Requires Phase I + Customer Memorandum + prototype

The differentiator is end-user pull. Mindy's edge: we already talk to APEX centers, OSBP, and base small-business offices through the partnerships motion — **any of them can be the SBIR end-user.** The funding track and the partnerships track reinforce each other here.

1.5 DoD OSBP angle (verified interest, no dedicated topic)

- OSBP's mission = increase small-biz participation + **strengthen the DIB** (business.defense.gov). Runs the **Commercialization Readiness Program (CRP)** — a Phase III transition lever, not a topic.
- Adjacent OSD demand exists: **DAVE** (Defense Acquisition Visibility Environment) maintenance; **DIU Digital OnRamp** uses AI to match commercial tech to DoD needs (conceptually parallel to Mindy).
- **No published OSBP SBIR topic** for "small-business industrial-base participation tooling" — the *interest* is documented, the topic isn't. Pitch into it via **AFWERX Open Topic with an OSBP end-user**.

2. Civilian federal — one real shot + a reframe

Eligibility column now reads two ways: as the for-profit SaaS vs. via the GovCon Giants **NONPROFIT**. The nonprofit path re-opens several programs.

Program	For-profit SaaS?	Via GovCon Giants nonprofit?	Award	Next deadline	Verdict
NSF SBIR/STTR NSF 26-510	YES — intended applicant	(for-profit is the right vehicle here)	Phase I up to \$305K	Jul 27 & Nov 4, 2026	🟡 POSSIBLE — only if reframed as deep-tech R&D (novel methods), NOT product engineering. Apply as the for-profit.
SBA GAFC	No (ESOs/accelerators)	✅ YES — nonprofit runs accelerator programming	75K→150K	FY26 TBD	🟢 NOW IN PLAY via nonprofit → license Mindy as the platform
SBA PRIME	No (nonprofits/gov/tribes)	✅ YES — exactly the intended applicant	capacity grants	~Apr–May	🟢 NOW IN PLAY via nonprofit (microenterprise TA)
EDA (B2S, Univ Ctrs, EAA)	No (EDOs/gov/univ/nonprofit)	✅ Possible — nonprofit in cooperation w/ a political subdivision	300K–2M	⚠️ lane partly frozen 2026	🟡 Nonprofit-eligible but lane frozen — watch, don't lead
MBDA center NOFOs (e.g. Rural Business Center)	No (center operators)	✅ YES — nonprofit can operate a center	center grant	Rural BC closes Jun 29	🟡 Nonprofit could bid + bundle Mindy (but MBDA in legal limbo — see §2 of research doc)
NIST MEP	No (awardee-restricted)	No	—	—	🔴 Off-mission — skip
Treasury SSBCI	No (funds states; dilutive)	No	debt/equity	—	🔴 Fails non-dilutive test

The NSF catch (be honest): NSF funds "deep technologies requiring substantial high-risk R&D," not "incremental product development." Mindy's current stack reads as applied engineering on existing techniques → which NSF declines. To compete, we'd need a defensible **research-grade hypothesis** (e.g., a novel ML approach to semantic capability-matching or win-prediction with measurable technical risk). If we can't articulate that honestly, don't force it.

3. State funding & vendor paths (5-state scan)

The universal finding: state *grants* fund the nonprofit/public/university centers, not the for-profit vendors that serve them. Mindy's realistic state path is mostly **be a vendor / get bought by the grantees** — with two exceptions. **And becoming a state vendor is a no-brainer we've already done — we've held TX and FL state contracts**, so those two (the best-fit states) are reactivations, not cold starts.

State	Best path	Verdict
MD ★	TEDCO — Social Impact funds (Pre-Seed Builder \$100K; Inclusion; Seed). Mission-matched to minority-business focus.	Best CAPITAL fit — but it's equity/convertible note, not grant , and requires a Maryland HQ + founder-disadvantage thresholds. Real money if we're open to MD registration.
FL ★★★	DMS Office of Supplier Diversity (OSD) — cleanest product fit in the scan. Vendor portals free + fast; <\$35K = pilot, no RFP.	Best near-term VENDOR path — and we've HELD a FL state contract before (past performance + likely-active registration). Reactivation, not cold start. Pair w/ FL SBDC (39 centers).
TX ★	DIR Cooperative Contract (Tech4TX) to sell SaaS to TX agencies/universities.	We've HELD a TX state contract before → reactivate. ⚠️ HUB → VetHUB restructure (Dec 2025) weakened the minority hook — pivot to veteran + general small business.
CA	Sell INTO TAEP/iHub-funded centers (100+ orgs = our buyers); DGS Small Business cert → sub-\$250K no-bid IT lane.	Vendor/channel — can't win the grants.
GA	Team Georgia Marketplace + DOAS workshops (natural Coach-Mode customer).	Vendor only. GA FAST = \$2,450 (federal-SBIR doorway only). No state MBE program.

Honest caveat (all 5 states): verified the *mechanisms* and mission-aligned offices, but found **no live RFP and no existing purchase** of a Mindy-like platform. These are warm BD pathways, not shovel-ready deals — validate with 1–2 discovery calls per priority state.

4. Prioritized funding plan

#	Move	Type	Effort	Realism	When
1	Reactivate TX + FL state vendor status (we've held contracts → past performance) → sell into FL OSD / TX agencies	Vendor rev	Low	★ Highest — proven path	Now (pull prior contract records)
2	Line up a govt end-user (Customer Memorandum) for AFWERX — via OSBP / an APEX center / base SBO shop	Pre-work	Med	The federal unlock	Now → Aug (use NAPEX)
3	AFWERX SBIR Open Topic Phase I	DoD R&D	Med	High IF #2 done	Next open window (confirm on DSIP)
4	Apply via GovCon Giants NONPROFIT — SBA GAFC + PRIME (now eligible) → license Mindy as the platform	Grant + rev	Med	Now in play (was )	Next FY26 cycles
5	Get Mindy written into partners' grant budgets (MBDA Rural BC, GAFC-winner ESOs, EDA subawards)	Revenue	Low-Med	Most realistic federal \$	Ongoing via partnerships
6	NSF SBIR Phase I go/no-go — only if we can write a real research question	Civilian R&D	High	Possible	Decide before Jul 27 or aim Nov 4
7	MD TEDCO — if open to MD HQ + cap-table fit	Equity	Med	Real money, structural strings	Eval Q3
8	Watch DoD SBIR 26.3+ for a reissue of topics 11887 / 25.D	DoD R&D	Low	Topic-dependent	Monitor DSIP monthly

What to SKIP outright: NIST MEP, Treasury SSBCI direct, NTIA. (*SBA PRIME/GAFC + EDA + MBDA NOFOs are NO LONGER auto-skip — they're eligible via the GovCon Giants nonprofit; moved to plan rows 4–5.*)

Confirm with counsel: the nonprofit-applies / for-profit-licenses structure (related-party + procurement story). Standard model, but get it clean before submitting.

5. Open items (for the FT hire)

- ☐ Identify + secure a government end-user willing to sign an AFWERX Customer Memorandum (the single highest-leverage funding task)
- ☐ Confirm next AFWERX Open Topic window on DSIP
- ☐ NSF 26-510 go/no-go: can we articulate a deep-tech research question? (If no, skip.)
- ☐ Pull live FY26 R3+ topic list on DSIP when pre-release drops — check for an 11887/25.D successor
- ☐ TEDCO: confirm MD-HQ requirement + which Social Impact fund fits the cap table
- ☐ FL OSD: discovery call to scope a <\$35K pilot
- ☐ For each partner grant (MBDA Rural Business Center, etc.): get Mindy named as a budget line item pre-award
- ☐ **Pull our prior TX + FL state contract records** — confirm current vendor registration status (DIR/CMBL for TX; MyFloridaMarketPlace/VBS for FL); reactivate where lapsed
- ☐ **Counsel review:** GovCon Giants nonprofit-applies / Mindy-licenses structure (related-party + procurement clean story) before any nonprofit grant submission
- ☐ Confirm which nonprofit grants GovCon Giants is best positioned for (GAFC accelerator programming vs. PRIME microenterprise TA)

Last updated: June 14, 2026 — research complete + two Eric assets folded in. Bottom line: (1) TX+FL state vendor = proven/reactivate (we've held contracts) — lowest-effort money; (2) AFWERX Open Topic (with a govt end-user) = the real DoD R&D path; (3) the GovCon Giants NONPROFIT re-opens SBA GAFC/PRIME/EDA/MBDA NOFOs that for-profit Mindy can't win alone → apply via nonprofit, license Mindy; (4) NSF = conditional deep-tech go/no-go; (5) MD TEDCO = equity if MD-HQ. Next: reactivate TX/FL vendor status + secure an AFWERX end-user via the partnerships motion + counsel-check the nonprofit structure.

AFWERX End-User Outreach

Goal: Secure a DAF (Air/Space Force) **government end-user** for an AFWERX SBIR Open Topic — the single highest-leverage federal funding task (per FUNDING-STRATEGY.md). **Owner:** Eric → FT Head of Partnerships & Funding **Status:** Templates ready — June 14, 2026 ⚡ **We already have 3 warm government contacts with stated needs — see below. The hard part of an AFWERX Phase I (a real government end-user) may already be in hand. Lead with these, not cold outreach.**

 LIVE government prospects (warm — Jun 14, 2026)

Three real contacts who already need help. This is the AFWERX unlock — finding an engaged end-user with a documented need is normally the whole challenge.

Contact	Org	Stated need	Maps to Mindy	AFWERX role	Priority
KO (<i>name TBD</i>)	Army MICC (Mission & Installation Contracting Command)	Market research for an acquisition (KO side)	Contractor search + CTA/market research	✅ Best fit — a KO can speak to acquisition needs → valid Customer/End-User	P1
(<i>name TBD</i>)	DISA	Researching expiring contracts (recompete intel)	★ Award-detail + incumbent engine — <i>already strong in product</i>	Customer/End-User OK (Joint — needs a DAF use case for AFWERX; can't be TPOC)	P1
(<i>name TBD</i>)	Navy OSBP	SMB market research	Contractor DB by socioeconomic + NAICS	Likely a CONNECTOR (OSBP = advisory) → route to a Navy operational office	P2

Honest AFWERX nuance: All three are **Joint/Army/Navy, not DAF (Air/Space Force)**. For AFWERX Open Topic specifically, a Joint org **can** be the Customer or End-User, but (a) the proposed solution must still show a **DAF use case**, and (b) a Joint person **cannot be the TPOC** (TPOC must be DAF military/civilian). So either: frame a DAF angle and use one of these as Customer/End-User + find a DAF TPOC, OR consider **other SBIR routes** where Army/Navy/DISA are the *direct* component (Army SBIR, Navy SBIR, DISA's own topics) — which may fit these contacts better than AFWERX. **Decide per contact: AFWERX-with-DAF-angle vs. their own component's SBIR.**

Each need is a different Mindy capability → harden the one that matches whoever advances first:

- MICC KO → acquisition market research (contractor/CTA search)
- DISA → expiring-contracts/recompete (the award-detail + incumbent spine — our strongest, most-built feature here)
- Navy OSBP → SMB market research (contractor DB by set-aside + NAICS)

Next on these: capture each contact's name/email/exact need → 20-min discovery call (Email 2 / Email 3) → confirm whether AFWERX-DAF-angle or their own component's SBIR is the cleaner path.

Read this first — what we're actually asking for (verified)

The research corrected a common misconception. Get this right or the outreach reads wrong:

1. **The signed "Customer Memorandum" is required at PHASE II, not Phase I.** At Phase I, *finding* the end-user **is the work** — AFWERX even assigns "SAGE fellows" + a curriculum to help. So **we are NOT asking anyone to sign anything now**. We're asking: *"is this a real problem for your unit, and would you be open to exploring fit?"* The signature comes later, only if we advance and only on the solicitation-specific form.
2. **Who can be the end-user/customer:** someone who can **speak for their organization on operational needs, requirements, or funding** — a program office or operational unit. **No rank requirement.** Active-duty OR civilian both qualify.
3. **Who is a CONNECTOR, not a signer:** OSBP / small-business offices and APEX Accelerators generally **cannot** be the signer (they're advisory) — but they are exactly who you ask to *introduce* you to the right operational end-user. Two different asks → two different emails below.
4. **It's non-binding, costs them nothing, no funding commitment** — and a government employee endorsing an SBIR is **explicitly authorized by federal ethics law** (5 CFR 2635.702(c) Exception 1, which cites the SBIR statute 15 U.S.C. §638). Say this — it removes their #1 hesitation.
5. **Low-pressure fallback:** an interested-but-not-primary person can give a **Letter of Support** (not graded, not binding) instead of being a signer.

The mission-need framing (lead with this, not the product): give a DAF office **visibility into small-business participation across the 14 Critical Technology Areas**, and help **strengthen the defense industrial base** by getting more qualified small/minority firms into the supply chain. That's a *government end-user* story — the vendor-tool framing is not.

What Mindy actually is (verified facts to ground the pitch)

- **317,106 award-winning federal contractors** — searchable by NAICS, agency, set-aside, state (USASpending universe) → supply-chain / teaming visibility

- **125,000+ federal contracting POCs + 88,000+ live SAM.gov opportunities**
 - **The 14 DoD Critical Technology Areas are live in-product** — opportunities are auto-tagged to CTAs (cta_codes, CTA filter shipped June 2026) → the 35% mandate alignment view
 - **UEI-based win attribution** — tie a roster of small firms to their real contract awards
 - Already the platform behind APEX/SBDC "Coach Mode"
-

EMAIL 1 — to a CONNECTOR (OSBP / APEX director / base small-business office)

Use when: you want a warm intro to the right operational end-user. This person opens the door; they don't sign.

Subject: Quick intro request — small-business visibility into the 14 Critical Tech Areas

Hi [Name],

I run GovCon Giants / Mindy — we built an AI platform that maps which small and minority businesses are actually winning (and could win) work across the DoD's 14 Critical Technology Areas. 317K contractor profiles, the full CTA-tagged opportunity feed, and win-attribution by UEI.

We're exploring an **AFWERX SBIR Open Topic** to extend it into a tool a DAF office could use to **see small-business participation in the industrial base by Critical Tech Area** — the kind of visibility that's hard to pull together today.

For Phase I I'm not asking for any commitment — I'm trying to find the **right operational end-user**: a program office or unit that feels the pain of not having that visibility. **Who in your network would be the right person to talk to?** Happy to send a one-paragraph description you can forward.

Grateful for any pointer.

[Eric] · [title] · [phone] · [email]

EMAIL 2 — to a potential END-USER (DAF program office / operational unit)

Use when: you've reached someone who could speak for an operational need. The ask is a 20-minute conversation, NOT a signature.

Subject: Does your team have visibility into small-business participation by Critical Tech Area?

Hi [Name],

Quick question for [office/unit]: when you need to know **which small or minority businesses are positioned in a given Critical Technology Area** — who's won there, who could team, where the industrial-base gaps are — how do you pull that together today?

We built a platform (Mindy) that does exactly this: 317K contractor profiles, the DoD's 14 CTAs tagged across the live opportunity feed, and win-attribution by UEI. We're exploring an **AFWERX SBIR Open Topic** to shape it around a real DAF use case, and Phase I is about finding the right end-user to make sure we build the *right* thing.

A few things that make this easy:

- I'm **not asking you to sign or commit to anything** — Phase I is exploratory. (A formal endorsement, if we ever advance to Phase II, is non-binding, costs nothing, requires no funding, and is specifically authorized for SBIR under federal ethics rules.)
- The only ask today is **~20 minutes** to hear whether this solves a real problem for your team.

If it's a fit, great; if not, you'll have shaped something useful either way. Open to a short call this week or next?

[Eric] · [title] · [phone] · [email]

EMAIL 3 — NAPEX / in-person follow-up (warm)

Use after meeting a DAF small-business or program person at NAPEX (Aug 16–20) or an APEX event.

Subject: Great meeting you at [event] — the CTA visibility tool

Hi [Name],

Great talking at [event]. As promised — here's the one-paragraph on what we're building:

Mindy maps small/minority-business participation across the DoD's 14 Critical Technology Areas (317K contractor profiles, CTA-tagged opportunity feed, UEI win-attribution). We're pursuing an AFWERX SBIR Open Topic and looking for the right DAF end-user to shape it around a real mission need.

You mentioned [specific thing they said] — that's exactly the kind of problem this targets. Could I get 20 minutes to walk through it, or is there someone on the operational side you'd point me to?

No commitment on your end — Phase I is about finding the right fit.

[Eric] · [phone] · [email]

How to find end-users (AFWERX-recommended channels)

- **DAF Tech Connect** — airforcetechconnect.org
- **AFLCMC Small Business Office** — afmc.af.mil/Small-Business-Office/ (*connector*)
- **Defense Innovation Marketplace** — defenseinnovationmarketplace.dtic.mil/industry-portal/
- **AFWERX SAGE fellows** — assigned to help you make end-user connections once in Phase I
- **Our own warm paths:** OSBP contacts + APEX directors from the partnerships motion (NAPEX Aug 16–20 is a room full of connectors) — they introduce; the operational office signs later.

Sequence

1. **Now** → **NAPEX:** send Email 1 to OSBP / APEX connectors we already know; collect end-user intros.
2. **At NAPEX (Aug):** meet DAF small-business + program people in person → Email 3 follow-ups.
3. **Identify 1–2 candidate end-users** who confirm a real need (Email 2 conversations).
4. **Submit Phase I** on the next AFWERX Open Topic window (confirm on DSIP) — naming the end-user relationship as the transition path.
Signature happens only if we advance to Phase II.

Etiquette guardrails

- **Lead with the mission need, not the product.** First question is always "is this a real problem for you?"
 - **Never ask for a signature in a first contact.** Phase I = exploration.
 - **Be explicit it's non-binding / no cost / ethics-authorized** — that's the unlock.
 - **Don't conflate roles:** Customer/End-User just express interest; the TPOC takes on performance-monitoring after award. Don't over-ask.
 - Use the **solicitation-specific** memo version only — never collect signatures on an old form.
-

 - Mindy facts: [market-assassin/docs/MARKETING-FEATURE-LITERATURE.md](#)
-

Created June 14, 2026. Key correction baked in: the Customer Memorandum is a Phase II requirement — at Phase I we're FINDING the end-user, so outreach asks for a conversation, never a signature.

AFWERX SBIR — Readiness Priorities

Goal: Get to a submittable, winnable AFWERX Open Topic Phase I. **Owner:** Eric → FT Head of Partnerships & Funding (+ product for CTA work) **Status:** Plan — June 14, 2026 **Companions:** [FUNDING-STRATEGY.md](#) (why AFWERX), [AFWERX-ENDUSER-OUTREACH.md](#) (the emails)

The governing principle (don't skip this)

AFWERX Phase I is won by a GOVERNMENT END-USER NEED, not a tech demo. The Customer Memorandum (proof a DAF office wants this) is the deliverable — and it's only formally required at **Phase II**. So the priority is **relationship first, product second** — and CTA work is scoped to **only what the end-user actually touches**, not gold-plating all 14.

This is why we do NOT lead with "harden all 14 CTAs." That's months of OSBP-validation work that doesn't move the Phase I needle. We make the **1–2 CTAs the end-user cares about** bulletproof, and defer the rest.

TIER 1 — wins Phase I (do these first)

1.1 Convert a warm government end-user ← 80% of the win — and we may already have it

We already have 3 warm contacts with stated needs (see AFWERX-ENDUSER-OUTREACH.md → Live prospects): **Army MICC KO** (acquisition market research), **DISA** (expiring-contracts research), **Navy OSBP** (SMB market research). Finding an engaged end-user is normally the whole battle — we're past it. So Tier 1.1 is **convert**, not discover:

- **Capture each contact's name/email/exact need** → 20-min discovery call each (Email 2/3).
- **Per contact, pick the SBIR route:** AFWERX (needs a DAF use case + DAF TPOC — these are Army/Navy/Joint, so AFWERX requires a DAF angle) **vs.** the contact's **own component SBIR** (Army SBIR / Navy SBIR / DISA topics) where they're the direct customer. The own-component route may be cleaner for MICC/DISA/Navy than forcing an AFWERX-DAF frame.
- **NAPEX (Aug 16–20)** is now a *backup* discovery room + a place to find a DAF TPOC if we go AFWERX.
- Output: a named end-user + the right SBIR vehicle. **This still gates everything else.**

1.2 Harden the CAPABILITY the winning end-user actually needs ← scoped to their need, not all of CTA

Each contact needs a *different* Mindy capability — harden whichever one advances first. **Don't assume it's CTA tagging.** Map:

- **DISA** → **expiring-contracts / recompetete**. This is the **award-detail + incumbent engine** (`src/lib/usaspending/award-detail.ts`, `find-predecessor.ts`) — **already our strongest, most-built feature**. Demo-survival here = make sure recompetete results are accurate + complete for DISA-relevant agencies. Likely the *easiest* of the three to make bulletproof.
- **MICC KO** → **acquisition market research**. Contractor search + (if their requirement is CTA-adjacent) CTA tagging. If CTA matters: validate the NAICS anchors for *their* CTA against real DoD award history (USASpending, 317K dataset), expand its keywords ~5→30+ (bare "AI"/"drone"/"UAS" missing today), spot-check 10 real solicitations they'd recognize.
- **Navy OSBP** → **SMB market research**. Contractor DB by set-aside + NAICS — verify socioeconomic filters return clean, complete results.
- **Spot-check is the demo-survival test for all three:** pull 10 real cases the end-user would recognize → confirm Mindy nails them → fix misses before any live demo.

1.3 Write the Phase I narrative around the DIB-visibility mission

- Frame: "give a DAF office visibility into small-business participation across [CTA], and strengthen the industrial base by surfacing qualified small/minority firms to team."
- Ground in real Mindy facts: 317K contractors, CTA-tagged feed, UEI win attribution.
- A government end-user story — NOT a vendor-tool pitch.

TIER 2 — makes the proposal/demo solid (not a Phase I blocker)

2.1 One source of truth for CTA tags

- **Kill the in-memory vs. DB inconsistency** the audit flagged (same opp can show different tags on refresh). Finish the DB backfill, then have the feed read DB tags only.
- Files: `src/lib/cta/tagger.ts`, `src/app/api/cron/tag-cta/route.ts`, the in-memory path in `/api/app/opportunities`.

2.2 Finish the backfill to 100%

- Audit found ~30% coverage / backfill still in-flight (June 13). Resume the cron, monitor, drain to 100% so the feed isn't sparse/inconsistent. Admin: `/api/admin/cta-tagging`.

2.3 Surface "why matched" on demand

- Confidence (high/med/low) + match reason (NAICS vs keyword) is already tracked — expose it in the UI for the demo so an expert can see the logic, not a black box. Low lift, high trust.

TIER 3 — defer (real, but not for this Phase I)

- OSBP-validate **all 14** CTAs (only matters once we're selling the full CTA product / Phase II)
- Manual tag override / dispute mechanism
- Org-level CTA reporting + funder export (that's the Phase II *build*, which the SBIR funds — don't pre-build it)
- ML classifier for tagging (rules-based is fine for Phase I; revisit at scale)

What changed from the raw CTA audit

The audit (honest, correct) said the CTA tagging is "fragile and incomplete for a credible DoD pitch" across all 14. **True — but for Phase I we don't need all 14.** We need:

- a real end-user need (Tier 1.1),
- their 1–2 CTAs accurate enough to not visibly miss (Tier 1.2),

- a clean, consistent feed (Tier 2.1–2.2).

The rest of the audit's red flags (full-14 NAICS validation, dispute mechanism, ML classifier) are **Tier 3** — correct to fix eventually, wrong to block Phase I on.

Sequence

1. **Now:** send connector emails (1.1); resume CTA backfill (2.2 — it's just running the cron).
2. **As end-user(s) surface:** harden their specific CTA(s) (1.2); fix tag consistency (2.1).
3. **At NAPEX (Aug):** lock the end-user relationship; spot-check their CTA live.
4. **Next AFWERX Open Topic window** (confirm on DSIP): submit Phase I citing the end-user.
5. **Phase I award** → **use the SBIR to build** the org-level CTA reporting (Tier 3) — that's what the money is for.

Open items

- ☐ **Capture name/email/exact need for the 3 warm contacts** (Army MICC KO, DISA, Navy OSBP)
- ☐ 20-min discovery call each → confirm the need + which is most ready to be a Phase I end-user
- ☐ **Per contact, decide SBIR vehicle:** AFWERX (DAF angle + DAF TPOC) vs. their own component SBIR (Army / Navy / DISA) — pick the cleaner path
- ☐ Harden the capability the lead contact needs (DISA→recompete engine / MICC→market research / Navy→SMB DB) — spot-check 10 real cases
- ☐ Resume + complete CTA backfill (~30%) — only critical if a CTA-search contact leads
- ☐ Confirm next AFWERX Open Topic window on DSIP (+ Army/Navy SBIR cycles if going component route)
- ☐ Fix in-memory/DB tag inconsistency before any live demo

Created June 14, 2026. Priority locked: END-USER FIRST, CTA SECOND. UPDATE: we already have 3 warm govt contacts with stated needs (Army MICC KO, DISA expiring-contracts, Navy OSBP SMB research) — the hard part may be in hand. Tier 1.1 is now CONVERT, not discover; per contact, choose AFWERX (DAF angle) vs. their own component SBIR. Harden the capability the lead contact needs (DISA's recompete engine is already our strongest) — not necessarily CTA. Full-14 CTA validation stays Phase II.

EDC / MBDA Landscape Research — Phase 2

Status: IN PROGRESS (started June 14, 2026)
Owner: Eric (until FT hire)
Due: Jul 15, 2026 (per PRD §10)
Method: Every row must cite a real source URL or primary contact page — no LLM guesses.

1. EDC top targets — federal contracting programs

Priority states: **MD, GA, TX, FL, VA, CA** (per PRD).

#	Organization	State	GovCon program	Contact	APEX overlap	Source	Status
1	Prince George's County EDC	MD	Procurement 360: Targeting Opportunities (bi-monthly); GovCon Academy w/ MBCC	Kimberlee Andrews — kbandrews@co.pg.md.us , 301-583-4609	Likely refers to MD APEX	pgcedc.com/procurement360	P1 — outreach this week

#	Organization	State	GovCon program	Contact	APEX overlap	Source	Status
5	Maryland eMMA / MDPA	MD	30CAP, Get Certified Maryland Procurement Academy — state vendor training Small Contractor Development Program — 5-week cohort, twice/yr, free to SBE firms (county-contract focus today; federal = our upsell)	procurement.maryland.gov	MD APEX	procurement.maryland.gov/training	Research — state-level complement to PGC
6	Hillsborough County — Small Business Encouragement Div.	FL	Federal Government Contracting named target industry; LoudounBizMatch (up to 10 hr subsidized TA) + GovConnect convening (events + 1:1, not a cohort)	Theresa Kempa — KempaT@hcfl.gov , 813-276-2729 (div: SBE@HCFL.gov)	FL APEX not referenced	hcfl.gov/SCDP	Research — verified contact + real cohort (Tampa, non-Miami)
7	Loudoun County Economic Development	VA	RISE Cohort (4-wk) + Supplier Readiness Series + Prime-Ready Playbook — runs cohorts (corporate supplier-diversity today; federal "prime-ready" = our gap)	Jennifer Goldman, BD Mgr Small Biz — jennifer.goldman@loudoun.gov , 571-507-3736	APEX not referenced (NoVA GovCon training runs through VA APEX)	loudounpossible.com — federal GovCon	Research — NoVA federal density; EDO can host/sponsor a cohort
8	Southern CA Minority Supplier Dev. Council (SCMSDC)	CA	Georgia's APEX (ex-PTAC) — cohorts + workshops + BidMatch + 1:1 counseling, DoD-funded	Jade Cebedo, Dir. of Programs — jcebado@scmsdc.org , 213-689-3086	No APEX link (independent MBE council)	scmsdc.org/rise	Research — cohort muscle + 1,700 MBEs; minority-business advisor lane
9	GT APEX Accelerator (Georgia Tech / EI2) ⚠	GA	Houston's APEX (ex-PTAC) — advising + workshops + webinars, 28 SE-TX counties, DoD-funded	Nancy Cleveland, Atlanta Region PM — nancy.cleveland@innovate.gatech.edu , 404-894-2000	IS the GA APEX	gtapexaccelerator.org	Research — ⚠ overlaps APEX track (coordinate, don't double-pitch)
10	UH APEX Accelerator (Univ. of Houston) ⚠	TX		Tim Healy, Program Director — uhapex@central.uh.edu , 832-842-8477	IS the TX APEX (Houston)	uhapex.uh.edu Services	Research — ⚠ overlaps APEX track

⚠ **Key finding (Jun 14):** In every priority metro, the **strongest** GovCon program is frequently the **APEX Accelerator itself** (GT APEX, UH APEX, FL APEX@USF, VA APEX@GMU, LA County APEX). Those belong to the **parallel APEX track** (projects/apex-sbdc-funding-strategy/) — coordinate via that channel, don't double-pitch them as EDCs. The best *non-APEX* EDC buyers are **county vendor academies** (Hillsborough, Loudoun) and **minority supplier councils** (SCMSDC) — they run cohorts but lean county/corporate, so federal opportunity intel is the **expansion angle**, not a 1:1 overlap.

Runner-ups logged (verified, parked): ACE WOSB Cohort (GA, ext. facilitator) · DFW MSDC / Dallas MBDA Center (TX) · Houston OBO — Brandon Jones (TX, municipal focus) · FSMSDC (FL, strong federal fit but CEO transition Dec 2025, site 403) · Arlington BizLaunch (VA) · VSEDC (CA, SBA PRIME 7-wk, grant-dependent) · Get in the Game LA coalition (CA, World Cup/Olympics procurement, JPMorgan-backed).

Disqualified: Community Business Partnership (Springfield VA) — site states operations concluded. Do not pursue.

Next research actions:

- ☐ Confirm whether Hillsborough / Loudoun cohorts will accept a *federal* track add-on (call the named contacts)
- ☐ FSMSDC — re-approach once new CEO seated (better federal fit than Hillsborough)
- ☐ Decide APEX-vs-EDC routing for GT APEX & UH APEX with the APEX advisor (avoid channel conflict)
- ☐ For each verified row: confirm budget cycle (county FY vs. corporate-member-funded) on a discovery call

2. MBDA center status matrix

🚫 **STRATEGIC CALL (Jun 14, 2026): MBDA Business Centers are NOT a reliable buyer channel right now.** The whole network is in legal limbo, no funding is confirmable, and every FY2021 agreement expires Aug 31, 2026. **Pursue the SURVIVING OPERATORS under their own names** (the universities / councils / chambers that held the agreements) + **state minority-business divisions** (§4) + **NMSDC councils** (§3) instead. Do not pitch a multi-year license to anything badged "MBDA center."

National status (verified — applies to every center)

- **Mar 14, 2025** — EO 14238 ("Continuing the Reduction of the Federal Bureaucracy") gutted MBDA; nearly all staff placed on leave. ([EO text](#))
- **Apr 17, 2025** — Commerce began terminating Business Center cooperative agreements (cease-operations orders). At least **9** formally cut by Aug 29, 2025; journalism describes "dozens."
- **Litigation — Rhode Island v. Trump, 1:25-cv-00128 (D.R.I.)**, 21-state suit (**CA, MD, VA are plaintiff states**; GA, TX, FL are NOT). Prelim. injunction May 2025 → **permanent injunction Nov 21, 2025** (reinstate funding/staff) → **defendants APPEALED Jan 2026**; compliance disputed. ([Clearinghouse 46344](#))
- **GAO-26-107718** (pub. Mar 27, 2026): confirms **39 active centers in 2024**; agreements terminated post-EO; some rescinded by injunction. No public roster appendix.
- **All FY2021 cooperative agreements run through Aug 31, 2026** — end-of-term regardless of litigation.
- **Verification blocker:** mbda.gov/business-center/* returns HTTP 403 to automated fetch; most operators have removed their MBDA pages. **No priority-state center could be confirmed as currently federally funded + operating.** "OPERATING" below = the host org shows life, NOT confirmed federal funding.

Priority-state center roster (status as of Jun 14, 2026)

Status legend: **TERMINATED** (documented) · **UNVERIFIED** (no live federal confirmation — verify by phone) · 🚩 plaintiff-state = stronger funding protection.

Center (operator)	State	Status (verified)	Surviving operator to pitch instead	Contact (verify before use)	Source
Georgia Statewide MBED (Georgia Tech EI ²)	GA	UNVERIFIED → likely terminated	GT EI² / GT APEX (row 9) under own name	via gtapexaccelerator.org	archival site
NC MBDA Center	NC	TERMINATED Apr 17, 2025	NC HUB Office (state, open)	ncmbda@doa.nc.gov	NC DOA HUB
San Antonio MBDA (UTSA Inst. for Econ. Dev.)	TX	TERMINATED — domain disabled	UTSA IED / SBDC network	iedtexas.org	iedtexas.org
El Paso MBDA (El Paso Hispanic Chamber)	TX	TERMINATED (grant ended Jul 2024)	EPHCC self-funded "Growth Solutions"	ephcc.org	El Paso Matters
DFW MBDA (DFW MSDC)	TX	UNVERIFIED → likely terminated	DFW MSDC (NMSDC, own name)	andrew@dfwmsdc.com	dfwmsdc.com
Houston MBDA (Houston Comm. College)	TX	UNVERIFIED → likely terminated	HCC / City of Houston OBO / Houston MSDC	—	hccs.edu/mbda
Orlando MBDA (3D Strategic Mgmt)	FL	UNVERIFIED — strongest live signals (active site/IG)	3D Strategic Mgmt under own name	407-251-7021; info@orlandombdacenter.com (verify)	orlandombdacenter.com
Miami MBDA (FSMSDC)	FL	UNVERIFIED — CEO transition Dec 2025	FSMSDC (NMSDC) under own name	via fsmsdc.org/contact-us	fsmsdc.org
Virginia MBDA (CRMSDC) 🚩	VA	UNVERIFIED — domain redirects, socials "(ARCHIVED)"	CRMSDC (NMSDC) + VA SBSDC (state)	via crmsdc.org	LinkedIn (archived)
MBDA Business Center — LA (USC) 🚩	CA	UNVERIFIED, leaning OPERATING (live USC dir.)	USC center; SCMSDC (row 8)	Dir. Sergio Gascon, 213-743-2164	USC dir.

Center (operator)	State	Status (verified)	Surviving operator to pitch instead	Contact (verify before use)	Source
Sacramento MBDA (CalAsian Chamber) ⚠️	CA	TERMINATED — closed Jun 30, 2025 (operator notice)	CalAsian Chamber; CalOSBA	(916) 446-7883	sacramentombda.com
SF Bay Area MBDA (ASIAN, Inc.) ⚠️	CA	UNVERIFIED → likely terminated (pages 404)	WRMSDC; CalOSBA	—	asianinc.org
Baltimore MBDA (L.S. Caldwell & Assoc.) ⚠️	MD	UNVERIFIED (host site live, 2025–26)	L.S. Caldwell under own name; MD GOSBA	Dir. Gary Moore, via site	marylandmbdacenter.com
Baltimore MBDA AMC (Baltimore City SMBA&D) ⚠️	MD	UNVERIFIED (city office active)	Baltimore City SMBA&D	N. Scott Phillips, 443-401-0242	baltimorembda.com
MBDA Federal Procurement Center (was CRMSDC) ⚠️	MD/DC	TRANSITIONED ~May 1, 2025 to KDM & Associates (NOT ceased — corrected Jun 14; the "ceased Jun 2025" in Kolumn = a <i>Utah</i> center). Still operating under KDM.	KDM & Associates (Keith Moore) — now its own asset; CRMSDC runs the 12-wk GovCon Incubator separately (see §3)	mbdafpcenter.com → kdm-assoc.com	FPC→KDM transition

~16 of 39 centers accounted for (priority states + GA/NC). Full national roster sits behind the 403-blocked mbda.gov locator + GAO PDF — not pulled.

The one qualifying question (settles any center by phone): "Is your MBDA cooperative agreement currently funded, and is it being renewed past Aug 31, 2026?" If no → pitch the operator under its own name, not as an MBDA center.

Best surviving-operator leads from this matrix: Orlando (3D Strategic — most alive), USC LA center (plaintiff state + live directory), FSMSSDC & DFW MSDC & CRMSDC (already NMSDC councils → see §3), Baltimore AMC (city office, stable funding), KDM & Associates (took over the Federal Procurement Center). **Avoid (confirmed terminated):** San Antonio, El Paso, Sacramento, NC.

Rule: Do not pitch multi-year licenses to centers that posted termination notices or can't confirm funding past Aug 31, 2026. Plaintiff-state centers (CA/MD/VA ⚠️) have stronger near-term funding protection than GA/TX/FL.

3. NMSDC regional councils (23 affiliates)

Certify **17,000+ MBEs**; connect to **1,700+ corporate buyers** (nmsdc.org, 2026 site copy).

Region bucket	Councils (verified names)	Priority for advisor
Region 1	North Central, Northwest Mountain, Mountain Plains, Western Regional	Low (post-NAPEX)
Region 2	Pacific Southwest, Southern California, Southwest, Dallas/Fort Worth	TX advisor
Region 3	Chicago, Michigan, Mid-States, Ohio	Midwest
Region 4	Capital Region, Eastern, Greater New England, New York & New Jersey	MD/VA adjacency
Region 5	Florida State, Georgia, Puerto Rico	GA advisor — P2
Region 6	Carolinas-Virginia, Houston, Southern Region, TriState	Carolinas-Virginia + Houston first

Full affiliate list: nmsdc.org/about/regional-affiliates

Priority-state council leadership (verified Jun 14, 2026)

Several of these are the **surviving operators** of now-dead MBDA centers (§2) — their MBEs just *lost* a federal-contracting support pipeline, which is the clean opening for a Mindy partnership.

Council	States	President/CEO	Contact (verify before use)	GovCon programming	MBDA-center tie	Priority
CRMSDC (Capital Region)	DC, MD, N.VA	Sharon R. Pinder , Pres & CEO	301-593-5860 · crmsdc@crmsdc.org	★ Strongest: 12-week Government Contracting Incubator (cohort) + Capital Readiness Program (NMSDC + KDM)	Ran the VA MBDA center; the Federal Procurement Center transitioned to KDM (§2)	P1 — cohort fit, MD/VA core

Council	States	President/CEO	Contact (verify before use)	GovCon programming	MBDA-center tie	Priority
GMSDC → rebranding "Georgia Business Council"	GA	Stacey J. Key , Pres & CEO	404-589-4929 · info@georgiacouncil.org	Gov+corporate matchmaking events (Business Opportunity Exchange; DOE OSDBU- attended expo) — not a GovCon cohort	—	P1 — GA advisor lane
FSMSDC	FL	IN TRANSITION (Louissaint out Dec 12 2025; successor unconfirmed — <i>verify by phone</i>)	via fsmsdc.org/contact-us · old line (305) 762-6151 (stale)	Ran the Miami MBDA Center (procurement readiness — bid/proposal prep, award-history research) now defunct	Ran Miami MBDA Center (\$2)	P2 — strong fit, wait for new CEO
DFW MSDC	N. Texas	Margo J. Posey , Pres & CEO (since 1992)	214-630-0747 · andrew@dfwmsdc.com	Ran the Dallas MBDA Center (\$1.8B awards over grant); HUB advocacy, ACCESS expo	Ran Dallas MBDA Center (\$2)	P2 — TX advisor lane
HMSDC (Houston)	TX Gulf Coast	Ingrid M. Robinson , Pres & CEO	713-271-7805 · info@hmsdc.org	MBE cert + corporate matchmaking + "MBE Pathway to Success" — no federal cohort found	None found	P3 — weaker GovCon fit
CVMSDC (Carolinas- Virginia)	NC, SC, VA	Dominique Milton , Pres & Chief Engagement Officer	704-549-1000 · info@cvmsdc.org	ProForum (corporate procurement) — no GovCon cohort found	None (corrects earlier mix-up — VA MBDA center was CRMSDC, not CVMSDC)	P3 — VA overlap w/ CRMSDC
SCMSDC (S. California)	SoCal	Virginia Gomez, Pres & CEO	213-689-6965 · programs: Jade Cebedo jcebedo@scmsdc.org	RISE cohort + Prime-Ready Playbook (see §1 row 8)	—	P2 — already a §1 lead

Angle for ex-MBDA-center councils (CRMSDC, FSMSDC, DFW): "Your MBEs lost their MBDA federal-contracting support in 2025. Mindy gives the council a coach dashboard to keep delivering opportunity intel + teaming search to those members — at a fraction of a center's cost."

Open research (remaining):

- ☐ Confirm FSMSDC's current CEO by phone before any outreach (transition unresolved)
- ☐ Confirm CRMSDC 12-wk Incubator's current run status (was MBDA-CRP-funded — verify it survived 2025)
- ☐ Pull president/CEO + GovCon programming for remaining Region 2/3/4 councils when expanding beyond priority states

4. State minority business divisions (a LEAD channel, not just MBDA backfill)

When federal MBDA coop terminates, **state-funded** operators remain (never MBDA-funded → durable). They certify firms for **STATE** procurement, not federal.

💡 **Strategic upgrade (Eric, Jun 14): treat state-cert programs as a LEAD channel, not a consolation backfill.** The reasoning — this is where we make a splash *away* from the crowd:

1. **Less competition.** Every GovCon SaaS vendor crowds the federal door (SAM/APEX/SBIR). State SB/MBE/HUB programs are largely **unserved by opportunity-intelligence tooling** → we're early, not 50th.
2. **Captive pre-qualified cohorts + a built-in channel.** TX HUB, MD GOSBA, CA DGS-OSDS already run recurring **vendor forums + training series** with rosters of certified firms — exactly what Mindy's coach dashboard plugs into.
3. **The upsell ladder is natural:** firm gets state-certified → wins state work → "now how do I go federal?" — Mindy is the bridge, and we reach them BEFORE they shop federal tools. The state program looks like a hero.
4. **Durable buyers** (state-funded, MBDA-independent).

The honest Mindy angle = "graduate your certified SB/MBE firms from state contracting to **FEDERAL** — opportunity intel + teaming the state program doesn't provide." Verified Jun 14, 2026.

State	Office (parent)	What it does	GovCon programming	Contact (verify before use)	Source
NC	NC HUB Office (Dept. of Admin.)	State HUB cert; absorbed NC MBDA messaging	State procurement outreach	ncmbda@doa.nc.gov	NC DOA HUB
★ MD	GOSBA (Gov's Office of Small, Minority & Women Biz Affairs) + MDOT (the certifier)	GOSBA = policy + active training/webinars ; MDOT = statewide MBE/DBE cert engine	Yes (GOSBA strong) — T.I.P.S. series, "Ready Set	GOSBA: 410-697-9600 · info.gomdsmbiz@maryland.gov (Sp. Sec. Y. Maria Martinez). MDOT OMBE: 410-865-1269	gomdsmbiz.maryland.gov

CalOSBA Dir. Tara Lynn Gray	dgs.ca.gov OSDS
GA ⚠	DOAS Small Biz & Supplier Diversity (lightweight)	NO strong state MBE program — light cert + state-procurement workshops. Marquee "Mentor-Protégé" is nonprofit/GMSDC-run, not state	State-procurement workshops only	supplier.diversity@doas.ga.gov · 404-656-5514	doas.ga.gov

Routing notes:

- ★ **Best state-division targets: TX HUB, MD GOSBA, CA DGS-OSDS** — all run real procurement-readiness programming with a distribution channel Mindy can plug a "now go federal" session into.
- ⚠ **GA:** route through **GMSDC** (§3, Stacey Key), not the state — GA has no strong state MBE division.
- CPUC GO 156 (CA)** = utility supplier diversity, NOT government contracting — wrong target for a federal SaaS. Skipped.
- Caveat:** FL OSD director unverified (3 conflicting names); MD small-biz functions may be reorganizing into a new Dept. of Social & Economic Mobility — confirm org chart before formal outreach.

5. WIOA boards (P3 — defer until one EDC eval live)

Board	State	Veteran / GovCon angle	Contact	Status
TBD	MD	Near PGC pilot		Open
TBD	TX	San Antonio cohort overlap		Open
TBD	GA			Open
TBD	VA			Open
TBD	FL			Open

~550 local boards nationwide (DOL). Scan after first EDC case study.

6. EDA + funding NOFO calendar

Full deadline-driven rows now seeded in **grant-nofo-tracker.md** (7 verified rows). Scan summary (Jun 14, 2026):

Two near-term ACTIONS:

- DoD SBIR/STTR Release 26.3** — opens **Jun 24**, closes **Jul 22, 2026** (then monthly R4–R6 through Oct). Reauthorized Apr 13, 2026; monthly BAA cadence. Mindy = CTA-tagged topic match + UEI win attribution. dodsbiirsttr.mil
- MBDA Rural Business Center Program** MBDA-0BC-2026-00003 — closes **Jun 29, 2026** (live now; a surviving-operator partner could bid + bundle Mindy). grants.gov/362605

Honest status of the rest:

- **EDA:** competitive programs (Build-to-Scale, University Centers, Tech Hubs) are **paused / between-cycles** in 2026 — only the rolling **Public Works & EAA NOFO** (PWEAA2023) is open. Thin pipeline.
- **SBA GAFC + PRIME:** **no confirmed FY2026 NOFO** as of Jun 2026 (FY25 cycles closed). Re-poll monthly — do not assume a date.
- **NIST MEP:** main FY26 competition **closed Feb 4, 2026**; the new Pilot is current-awardees-only. Low fit.

Still open (Phase 2):

- ☐ State commerce/innovation RFPs (TX/MD/CA/FL) — tie to §4 state-cert programs as the LEAD channel (see §4 strategic upgrade). Most are state-procurement vendor solicitations, not grants — check each state's eVA/ESBD/Cal eProcure portal.
- ☐ DoD OSBP contact map for the complementary CTA-dashboard pitch (relationship-driven, not a NOFO).
- ☐ Confirm DoD SBIR 26.3 exact BAA code on DSIP before any submission.

7. Pricing validation log

Target: **3 discovery calls at \$50K EDC price point** before standardizing.

Date	Org	Reaction to \$50K cohort	Notes
	PGC EDC		First call

8. Events & booth calendar (be in the room where they all gather)

Strategy (Eric, Jun 14): instead of cold-emailing each org one-by-one, **get a booth at the national conferences where these buyers gather** — APEX directors, SBDC leaders, NMSDC councils, EDC pros. One booth = dozens of warm conversations. Catalog the ones bookable **before year-end 2026** and lock booths now (booths sell out; several have no published deadline = first-come). Verified Jun 14, 2026.

Event (host)	2026 dates / venue	Audience (scale)	Booth cost	Deadline	Book?
★ NAPEX National Conference (Nat'l APEX Accelerator Alliance)	Aug 16–20 · Orlando, Omni ChampionsGate	APEX directors + counselors (400+)	\$1,500 govt exhibitor / \$3,500 general (incl. 1 reg)	Not published — first-come, apply NOW	YES — P1. Cheapest + most on-target room. Email headquarters@napex.us
★ America's SBDC Annual Training (ASBDC)	Sept 29 – Oct 1 · Atlanta Marriott Marquis	SBDC network leaders/directors (~1,000)	Exhibitor price in prospectus; sponsorships from \$10K	In prospectus — request now	YES — P2. Pull prospectus from nationaltraining.americassbdc.org
NMSDC Conference & Exchange	Oct 25–28 · Los Angeles Convention Center	Corp. supplier-diversity + certified MBEs + councils (~3,400)	TBA (opens ~May); ⚠️ exhibitor ELIGIBILITY gated — must be NMSDC-certified MBE / corp member / gov agency	TBA	VERIFY ELIGIBILITY FIRST (events@nmsdc.org) — may not qualify to exhibit
IEDC Annual Conference	Oct 25–28 · Hyatt Regency New Orleans	Economic-development pros (1,500+)	Via prospectus (not public)	Via prospectus	Maybe — ⚠️ exact date collision with NMSDC (one crew can't do both)
NADO — EDA Atlanta Region Econ. Dev. Conf.	Jul 21–23 · Atlanta	EDA-region grantees/practitioners	Verify w/ NADO	Verify	Maybe — closest thing to an "EDA convening"
MBDA-MED Week	NO 2026 EVENT	—	—	—	DROP — MBDA gutted; last MED Week was Oct 2024. Don't budget.
America's SBDC Leadership Summit (watch)	Mar 6–10, 2027 · Washington DC	State/Regional SBDC directors (the buyers)	TBA (reg opens Jan 2027)	Jan 2027	Watch — higher-leverage director room; set Jan reminder

Decisions:

- **Book NAPEX (Aug, Orlando) now** — \$1,500, exactly the APEX-director audience, before year-end, first-come. Single highest-ROI action in this whole doc.
- **Request the ASBDC prospectus** (Sept, Atlanta) — second room, SBDC leaders.
- **NMSDC: confirm we can even exhibit** before budgeting (eligibility gate, not cost).
- **Oct 25–28 conflict:** NMSDC (LA) vs IEDC (New Orleans) are the same days — pick one or split crews.
- **EDA:** no single national HQ grantee expo with open booths found; NADO Atlanta (Jul) is the closest. Check eda.gov/events directly.
- **MED Week is dead** — remove from any plan.

Open: NAPEX exhibitor deadline (email HQ); ASBDC + IEDC + NMSDC exact booth \$ (in prospectuses); whether our buyer qualifies for NMSDC exhibit eligibility.

Last updated: June 14, 2026 — §1 EDC top-10 + §2 MBDA matrix + §3 NMSDC priority-council leadership + §4 state divisions + §8 events/booth calendar all COMPLETE (verified CEOs/contacts for CRMSDC, GMSDC, FSMSDC, DFW, HMSDC, CVMSDC, SCMSDC). Corrected 2 §2 facts via §3 research: (a) VA MBDA center was CRMSDC not CVMSDC; (b) Federal Procurement Center TRANSITIONED to KDM & Associates ~May 2025, did not cease. Best NMSDC lead = CRMSDC (Sharon Pinder) — runs a 12-wk GovCon Incubator. Angle for ex-MBDA councils (CRMSDC/FSMSDC/DFW): their MBEs lost federal-contracting support → Mindy coach dashboard fills it. §4 state divisions: best = TX HUB / MD GOSBA / CA DGS-OSDS (GA has no strong state MBE → route via GMSDC). §8 events: BOOK NAPEX (Aug 16–20 Orlando, \$1,500 govt booth — top action) + ASBDC (Sept 29–Oct 1 Atlanta); NMSDC eligibility-gated; MED Week dead. §4 UPGRADED to a LEAD channel (state-cert = uncrowded beachhead, captive cohorts, state→federal upsell — Eric's call). §6 + grant-nofo-tracker seeded (7 verified rows); near-term = DoD SBIR 26.3 (Jun 24–Jul 22) + MBDA Rural Business Center (closes Jun 29); EDA competitive programs paused; GAFC/PRIME no FY26 NOFO (re-poll). **Phase 2 COMPLETE.** Next: execute outreach + book NAPEX.

Grant & NOFO Tracker — Mindy Platform R&D

Owner: Eric → FT Head of Partnerships & Funding (when hired)
Horizon: Rolling 90 days
Rule: Every row needs a real URL or SAM.gov/grants.gov ID before submission work starts.

Active watch list (seeded w/ verified IDs + dates — Jun 14, 2026)

Source	Program / topic	Fit for Mindy	Deadline (verified)	Status	URL / ID	Notes
DoD SBIR/STTR	Release 26.3 (monthly BAA cadence, reauthorized Apr 13 2026)	CTA-tagged topic match + UEI win attribution	Opens 24-Jun-2026 · closes 22-Jul-2026	★ ACT — next cycle	D0D_SBIR_2026_P3_* (verify exact code on DSIP) · dodsbirsttr.mil · BAA schedule	Then R4 (Jul 22–Aug 19), R5 (Aug 26–Sep 23), R6 (Sep 23–Oct 21). Pick a topic per release.
MBDA	Rural Business Center Program (still funding centers despite turmoil)	Partner/host angle for a center operator	Closes 29-Jun-2026	★ ACT — closes soon	MBDA-0BC-2026-00003 · grants.gov/362605	Live NOW. A surviving-operator could bid + bundle Mindy.
EDA	Public Works & Economic Adjustment Assistance (general NOFO)	EDC partnership; regional ecosystem	Rolling — no close date	Open	PWEAA2023 · grants.gov/346815	EDA's competitive programs (Build-to-Scale, Univ Centers) are PAUSED/between-cycles in 2026 — only rolling NOFOs open.
NIST MEP	Center State Competition FY26	Supplier-development incumbents	CLOSED 4-Feb-2026	Closed	2026-NIST-MEP-01	Pilot (FR 2026-10105, May 2026) = current MEP awardees ONLY. Low fit.
SBA	Growth Accelerator Fund Competition (GAFC)	Entrepreneur-support orgs (our audience)	FY26 NOT posted (FY25 closed 31-Jan-2025)	Watch — re-poll	sbir.gov/community/gafc	Do NOT publish a 2026 date — none confirmed. Re-check monthly.
SBA	PRIME (microenterprise TA)	Nonprofit/SBDC-adjacent TA providers	FY26 NOT posted (FY25 closed 27-May-2025)	Watch — re-poll	sba.gov/grants	Usually posts Apr–May; not up as of Jun 2026.
DoD OSBP	BAA / pilot (non-SBIR)	National CTA pipeline dashboard	Relationship-driven	Open	e.g. NRL Long-Range BAA N00173-24-S-BA01 (thru 30-Sep-2026)	Needs OSBP contact map (Phase 2).

⚠ **Rule reminder:** GAFC + PRIME have NO confirmed 2026 NOFO — left as "re-poll," not guessed. Re-verify the DoD 26.3 BAA code on DSIP before submission.

Submission pipeline

Grant	Phase	Internal owner	External deadline	Submitted	Result
SBIR Phase I (topic TBD)	Idea	Eric + product			
EDA (topic TBD)	Idea	FT hire			

Weekly ritual (15 min, Mondays)

1. Check dsbs.sbir.gov new topics
 2. Check grants.gov — search "minority business," "economic development," "small business technical assistance"
 3. Check eda.gov/funding for new NOFOs
 4. Update this table; flag anything due within 45 days to #ops or Eric directly
-

SBIR framing (draft — refine before submission)

Problem: APEX counselors and EDC program directors cannot prove client alignment to DoD Critical Technology Areas or aggregate contract wins across rosters without manual USASpending exports.

Solution: Mindy CTA-tagged opportunity feed + UEI roster win attribution + counselor reporting API.

Dual use: Strengthens defense industrial base small business participation (OSBP priority).

Started: June 14, 2026. Seeded w/ 7 verified rows. NEAR-TERM ACTIONS: DoD SBIR 26.3 (opens Jun 24, closes Jul 22) + MBDA Rural Business Center (closes Jun 29). GAFC/PRIME = no confirmed FY26 NOFO (re-poll, don't guess). EDA competitive programs paused; only rolling PWEAA open.

PRD: EDC, MBDA-Adjacent & State/Local Partnerships

Status: ACTIVE — execution started June 14, 2026 (see EXECUTION-RUNBOOK.md) **Date:** June 13, 2026 **Owner:** Eric (Strategy) / Head of Public Sector Partnerships & Funding (hire) **Related docs:**

-

0. TL;DR

Mindy already sells **Coach Mode + org licenses** to APEX, SBDC, and chambers. This PRD extends the same platform to **state/local economic development organizations (EDCs)**, **workforce boards**, and the **MBDA-adjacent ecosystem** (MBDA Business Centers, state minority business divisions, NMSDC regional councils).

The wedge is not "free alerts." It is:

1. **317,106 USASpending recipient profiles** — find primes, incumbents, and teammates by NAICS, agency, set-aside, state
2. **DoD Critical Technology Area (CTA) filters** — align client pursuits to the 35% mandate APEX centers must report on
3. **Teaming / Find Partners** — match small firms to larger contractors in the same CTA lane
4. **UEI roster → win attribution** (NAPEX build) — prove *their* clients won contracts, not industry aggregates

Relationship to APEX: Partner, don't replace. EDCs and MBDA-adjacent orgs often **refer** to APEX for 1:1 counseling; Mindy is the **reporting + matching layer** that makes quarterly funder narratives write themselves. DoD/OSBP direct funding is **complementary** (national CTA pipeline visibility), not channel conflict.

Dual revenue model:

- **B2B org licenses** (primary) — EDC/state contracts 50K–200K training + platform bundles
 - **Non-dilutive capital** (SBIR, EDA, SBA programs, state innovation grants) — funds R&D on EDMIS export, UEI attribution, funder report API
-

1. Problem Statement

Who has this problem?

Segment	Funder	Scale (verified)	What they must prove
State/local EDCs	State commerce, county/city EDC budgets, EDA grants	Thousands nationwide; GovCon programs vary (e.g. Prince George's County EDC runs Procurement 360 + GovCon Academy)	Jobs, capital accessed, minority business growth, contract wins in-region
Workforce boards	DOL WIOA	~550 local boards	Job placement, career pathways into high-wage sectors (federal contracting qualifies)
MBDA Business Centers	MBDA cooperative agreements (status disrupted 2025–26)	39 active centers in 2024 (GAO-26-107718)	Contract access, capital, export/market expansion for minority-owned enterprises
State minority business divisions	State appropriations	Operates when federal programs wobble	Same as MBDA mission — often the local operator when federal grants pause
NMSDC regional councils	Corporate + member dues	23 regional councils	MBE certification pipeline, corporate supplier diversity, contract matching

What's the pain?

These organizations run **cohort programs, academies, and procurement events** (training grants, EDA projects, chamber partnerships). They lack:

- A **searchable prime/teaming database** beyond manual LinkedIn and SAM entity search
- **CTA-aligned opportunity intelligence** for DoD industrial base narratives
- **Client-level win attribution** tied to roster UEIs (counselors export spreadsheets today)
- **One coach dashboard** that rolls up pursuit activity + outcomes for funder reports

OpenGovIQ sold APEX Illinois a **workbench** (50K–68K/yr). Mindy already ships that (Knowledge Base RAG + Proposal Assist). EDC/MBDA-adjacent buyers need **matching + outcomes**, not another internal AI sandbox.

Pitch line (use verbatim in outreach)

"We don't just help your clients find opportunities — we help you prove placement into the defense supply chain and match them to the right prime partners in Critical Technology Areas."

2. Landscape Research (Phase 1 — June 2026)

2.1 Economic Development Corporations (EDCs)

What they are: Public or public-private entities (county, city, regional) funded by state/local appropriations, EDA grants, and fee-for-service. Mission: jobs, capital, business retention/expansion.

GovCon relevance: Many EDCs run procurement academies, prime-sub networking, and certification workshops — often **alongside** (not instead of) APEX Accelerators.

Verified example: Prince George's County EDC (Maryland)

- **Procurement 360: Targeting Opportunities** — bi-monthly sessions aligning local businesses with one agency/prime per session (launched July 2025)
- **Government Contracting Academy** — 7-week cohort with Maryland Black Chamber of Commerce (March–May 2025)
- Focus: MBE certification, set-asides, prime subcontractor integration, federal + state + local agencies

Implication for Mindy: EDC deals look like **USHCC cohort packages** (training + platform + outcome reporting), not single-seat SaaS. Budget line items: 25K–100K training grants, 50K–200K multi-year EDA/state contracts.

Open research (Phase 2 — assign to FT hire):

- ☐ Inventory top 20 EDCs with active federal contracting programs (by state priority: GA, TX, FL, MD, VA, CA)
- ☐ Map EDA Revolving Loan Fund / Public Works / University Center NOFOs with GovCon-adjacent scopes
- ☐ Identify which EDCs already partner with APEX (referral vs. duplicate counseling)

2.2 MBDA & MBDA-Adjacent Ecosystem

Statutory role: MBDA is the only federal agency dedicated to minority business enterprise growth (Minority Business Development Act of 2021, Division K of IIJA).

2025–2026 disruption (public record — not LLM inference):

- March 14, 2025: Executive Order effectively eliminating MBDA

- May 13, 2025: Preliminary injunction requiring restoration (federal district court)
- November 2025: Permanent injunction vacating agency dismantling actions
- **January 2026:** Defendants appealed; **appeal pending as of February 27, 2026** (GAO-26-107718)
- GAO documented: cooperative agreements with business centers terminated; at least **9 centers** lost funding as of August 2025; staff reductions and grant pauses despite court orders (Senate Commerce / Small Business Committee letters, 2025)

Outreach targets (prioritized):

Target	Why	Warm path
MBDA Business Centers still operating	Direct MBDA mission; contract + capital focus	Research center-by-center post-injunction status
State minority business divisions	Often absorb programming when federal grants pause	State commerce dept outreach
NMSDC regional councils	23 councils; corporate supplier diversity	Recruit minority-business partnership advisor (see §4)
State Black/Hispanic/Asian chambers	Cohort training + member GovCon pipelines	USHCC playbook; MBCC/PGCEDC model
APEX centers with minority business focus	Already federally funded; CTA + win attribution story	NAPEX + Illinois re-warm

Do not assume: A single "replacement org" for MBDA. The landscape is **legally contested** and **center-by-center**. Every outreach must confirm current funding status before pitching multi-year licenses.

2.3 Workforce Boards (WIOA)

Fit: Federal contracting careers = high-wage placement outcomes WIOA boards report to DOL.

Mindy angle: Coach Mode for **career counselors** placing veterans and displaced workers into GovCon firms; contractor DB for "who's hiring in your NAICS/state."

Status in repo: No strategy doc. Phase 2 research item.

2.4 Coexistence vs. Competition with APEX

Motion	Relationship to APEX
Org license to each APEX center	Partner — strengthens their quarterly DoD report
EDC cohort + APEX referral	Partner — EDC runs academy; APEX does 1:1; Mindy tracks both
Pitch DoD OSBP on national CTA dashboard	Complement — aggregate view no single center builds
Match SMB ↔ prime via 317K DB	Value-add — counselors do this manually today
SBIR/BAA on CTA pipeline tech	Parallel funding — builds product centers then buy

Do not take counseling dollars. Take **reporting infrastructure + matching intelligence** dollars.

3. Product Fit (What Ships Today vs. Gaps)

3.1 Ready now (demo-able)

Capability	EDC/MBDA use case	Source
Coach Mode	Director dashboard, client switcher, org provisioning	/api/app/coach, PRD-coach-mode-apex.md
317K contractor search	Prime/incumbent/teaming by NAICS, agency, set-aside, state	USASpending BigQuery
125K+ SAM contracting POCs	Agency buyer contacts (count/teaser in product)	SAM cache
88K+ cached SAM opportunities	Daily briefings, pursuit alerts	Supabase cache
Knowledge Base RAG	Center playbooks, SOPs, proposal templates	Shipped
Proposal Assist V2	RFP upload, compliance matrix, .docx export	Shipped
SBIR / Grants tabs	Non-DOD funding pipeline for clients	Product UI
Teaming / Find Partners	MBE ↔ prime matching	Product (partial — validate NAPEX demo)
CTA filters	DoD 14 Critical Tech Areas on opportunity feed	Shipped June 2026 (cta_codes, Source Feed UI)

3.2 NAPEX-critical (Week 3–4, per parent PRD)

Capability	Why EDC/MBDA cares
UEI roster import	Tie cohort members to USASpending wins
Win attribution rollup	"Your program placed 12 clients into \$4.2M DoD contracts"
Funder report export	One-click PDF/CSV for quarterly narratives (Phase 2 — show mockup at NAPEX)

3.3 Phase 2 product (post-NAPEX)

Capability	Funder
EDMIS field mapping export	SBDC cooperative agreements
DoD APEX quarterly report template	APEX centers
State EDC outcome template	Jobs + capital + contracts in-region
MBE supplier diversity rollup	NMSDC / state minority divisions

4. Go-to-Market: Channel Map

Tier 1 — Execute now (documented elsewhere)

- **APEX** — NAPEX Aug 16–21; Illinois re-warm; CTA hook
- **Chambers** — USHCC Atlanta cohort recalibration
- **SBDC** — Same Coach Mode MOU; EDMIS Phase 2

Tier 2 — This PRD (EDC / MBDA-adjacent)

Priority	Channel	First target	Entry offer
P1	State EDC with active GovCon academy	Prince George's County EDC (MD) — proven Procurement 360 + MBCC partnership	60-day director eval → 50K–75K cohort + platform
P1	NMSDC regional council	Minority-business partnership advisor (recruit)	Enterprise license + member alert funnel
P2	State minority business division	GA, TX, FL, CA commerce depts	Pilot 1 state; mirror USHCC pricing ladder
P2	MBDA Business Center (operating)	Confirm post-injunction status per center	Eval → 35K–50K/yr (APEX Foundation ladder)
P3	Workforce board	Local board near existing chamber/APEX pilot	WIOA outcome reporting angle
P3	University innovation / PTAC-adjacent	State SBIR pipeline partners	SBIR tab + teaming

Regional partnership advisors (recruit — replaces retired assignments)

Prior advisor assignments (Ryan / Zach / Randie) are **retired June 2026**. Recruit three part-time or commission-based advisors to open doors; FT Head of Partnerships **closes**.

Role to recruit	Territory	Opens
APEX partnership advisor	APEX-heavy states (TX, FL, VA, MD, IL, CA)	Director intros pre-NAPEX
SBDC & chamber advisor	SBDC lead centers + regional chambers	Cohort pilots + 60-day eval intros
Minority-business partnership advisor	NMSDC councils + MBDA-adjacent + state MBE offices	MBDA-adjacent + corporate diversity intros

Profile: Former APEX director, SBDC lead, or NMSDC/MBDA center operator — credible with center directors, not a generic referral partner. Comp: intro bounty + % of first-year license (structure TBD with FT hire).

5. Pricing Ladder — EDC / MBDA-Adjacent

Reuse Coach Mode infrastructure. **Do not use chamber pricing for EDC/state deals** — budget envelopes are larger (training grants + EDA).

Tier	Audience	Price	What's included
60-Day Director Eval	EDC program director, MBDA center director, NMSDC regional lead	\$0	1 org_admin + up to 20 client workspaces; CTA filters; UEI attribution (when shipped); branded Org Tab
EDC Cohort Standard	Single EDC academy (20–40 firms)	\$50,000/yr	Director + 30 member seats; daily briefings; contractor DB; teaming; quarterly outcome report (mockup → production)
EDC Cohort Plus	Same + training bundle	75,000–100,000/yr	Standard + GovCon Giants bootcamp delivery (Eric/Sikander) + custom Knowledge Base
State EDC Network	State commerce dept (multi-EDC rollout)	150,000–200,000/yr	3–5 EDCs × Cohort Standard + statewide rollup
MBDA-Adjacent / NMSDC	Regional council or operating MBDA center	35,000–50,000/yr	Maps to APEX Foundation / Accelerated ladder (see parent PRD §8)

Chamber ladder (\$18K) remains for **trade associations without state commerce budgets**. EDC ladder is separate SKU.

6. Non-Dilutive Funding for Mindy (Platform R&D)

Dedicated owner required. SBIR funds **build**; org licenses fund **revenue**.

Source	Fit	Realistic use of funds
DoD SBIR/STTR	DoD OSBP / small business readiness tech	CTA matching engine, UEI attribution API, counselor reporting
SBA Growth Accelerator / PRIME	Underserved firm cohort tooling	Minority + rural coach platform
EDA (Economic Development Administration)	State EDC partnerships	Defense industrial base placement, export-adjacent contracting
State innovation / minority business grants	Single-state pilot	GA, TX, FL, CA commerce dept RFPs
DoD OSBP / OUSD(R&E)	35% CTA mandate tooling	National pipeline dashboard — industrial base strengthening narrative

Calendar ownership: FT hire maintains NOFO tracker, topic releases, submission deadlines.

Open research:

- ☐ Confirm SBIR topic alignment (OSBP, USAF AFWERX, Navy NAVSEA small business)
- ☐ EDA FY26 NOFO scan for "defense industrial base" / "minority business" keywords
- ☐ State RFP inventory (Q3 2026)

7. 90-Day Execution Sequence

When	Focus	Owner
Now → Jun 27	Ship/polish CTA filters + NAPEX demo laptop story	Product
Jun 28 – Jul 4	APEX director outreach (35% mandate hook)	Eric + FT hire (if onboarded)
Jul 1–15	Phase 2 research sprint: EDC top-20 inventory, MBDA center status check, 1 state commerce target	FT hire
Jul	UEI roster + win attribution live	Product
Jul 12–18	Reactivate APEX Illinois eval	Eric + FT hire
Aug 16–21	NAPEX — 10+ director meetings, 2 post-show pilot targets	Eric + FT hire (+ APEX advisor if recruited)
Post-NAPEX (Sep)	EDC pilot (PGC EDC or equivalent); NMSDC intro via minority-business advisor; SBIR Phase I draft	FT hire
Q4 2026	Productize funder report export; second EDC or MBDA-adjacent paid license	Product + FT hire

8. Success Metrics

6-month KPIs (partnerships)

Metric	Target
Signed 60-day director evals (APEX or EDC or MBDA-adjacent)	3
Paid org license (\$18K+ chamber or \$35K+ APEX/EDC)	1
NAPEX qualified director meetings	10+
Post-NAPEX pilots launched	2
EDC/MBDA landscape research doc complete	1 (this PRD Phase 2 appendix)

6-month KPIs (funding capture)

Metric	Target
Grant applications submitted	2 (SBIR + one state/EDA)
NOFO tracker live with 90-day horizon	Yes
LOI / pre-application conversations	3+

9. Risks & Mitigations

Risk	Likelihood	Impact	Mitigation
MBDA center funding still frozen despite court orders	High (2026)	Med	Target state minority divisions + NMSDC; confirm center status before pitch
EDC sees Mindy as competing with APEX	Med	Med	Position as reporting + matching layer ; encourage APEX referral
EDC budgets are grant-cycle dependent	Med	High	Align to academy cohort dates; offer eval straddling fiscal year
Funder report export not production-ready	Med	High	NAPEX mockup OK; paid deals require Phase 2 delivery date in contract
No FT owner — Eric is bottleneck	High	High	Hire before NAPEX (see JD)
SBIR win rate low	High	Low	Treat as optionality; org licenses remain primary

10. Phase 2 Research Backlog (Assign to FT Hire)

- ☐ **EDC inventory:** Top 20 orgs with federal contracting programs; contact, budget cycle, APEX relationship
- ☐ **MBDA center status matrix:** 39 centers (2024 GAO baseline) — operating / funded / alternative operator
- ☐ **NMSDC council map:** 23 regions — existing GovCon tooling, member alert partners
- ☐ **WIOA board scan:** 5 boards in APEX/EDC pilot states with veteran placement programs
- ☐ **EDA + state RFP calendar:** Next 4 quarters
- ☐ **DoD OSBP contact map:** CTA mandate owners for complementary (not competitive) pitch
- ☐ **Pricing validation:** 3 discovery calls at \$50K EDC price point before standardizing

Deliverable: projects/edc-mbda-partnerships/landscape-research-phase2.md — due **Jul 15, 2026**.

Last updated: June 14, 2026

Head of Public Sector Partnerships & Funding

Company: GovCon Giants / Mindy ([getmindy.ai](#)) **Location:** Remote (US time zones preferred; occasional travel for NAPEX, EDC events, partner meetings) **Type:** Full-time **Reports to:** Eric Coffie, Founder

The opportunity

Mindy is the AI-powered GovCon intelligence platform for small businesses — daily opportunity briefings, 317K-contractor search, market research, proposal assist, and **Coach Mode** for organizations that serve contractors.

We are building **reporting + matching infrastructure** for the coaches who fund federal small business programs:

- **92 APEX Accelerators** (DoD-funded, ~\$55M/yr) — must prove client contract wins + **35% Critical Technology Area alignment**
- **1,000+ SBDC offices** (SBA-funded) — must prove capital accessed, jobs created
- **State/local EDCs, workforce boards, MBDA-adjacent orgs** — must prove jobs, capital, and minority business growth in-region

Coach Mode ships. CTA filters ship. NAPEX 2026 (Aug 16–21, Orlando) is the forcing function. **We need one full-time owner** for partnerships and non-dilutive funding — not a generic SaaS BD rep who has never read a cooperative agreement.

This role closes org licenses **and** submits SBIR/EDA/state grant applications. You will demo Mindy, talk the CTA mandate without Eric on every call, and turn 60-day director evals into paid contracts.

What you'll own (~60% partnerships / ~40% funding)

Partnerships

1. **Center pipeline** — APEX directors, SBDC leads, state/local EDCs, MBDA Business Centers (where operating), NMSDC regional councils, and chamber cohorts. **Recruit and manage** three regional partnership advisors (APEX, SBDC/chamber, minority-business); they open doors — **you close**.
2. **Funder narrative** — Every pitch is "**grant renewal ammunition**," not "free tool." You speak EDMIS fields, DoD quarterly metrics, and jobs/capital outcomes fluently.
3. **MOU → eval → license** — Track 60-day director evals, NAPEX booth conversions, and cohort deals (18K–200K depending on buyer type).
4. **NAPEX 2026** — Pre-book director meetings, run booth conversations, follow up into signed evals within 30 days post-show.
5. **EDC/MBDA landscape research** — Maintain the target list (PRD-edc-mbda-partnerships.md Phase 2 backlog); confirm MBDA center funding status before outreach.

Funding capture

1. **Grant calendar** — SBIR/STTR topics, EDA NOFOs, SBA Growth Accelerator/PRIME, state commerce RFPs.
2. **Application writing** — Draft submissions; Eric and product provide technical input on CTA matching, UEI attribution, and coach APIs.
3. **Dual-track revenue** — SBIR funds R&D build; org licenses fund scale. You keep both pipelines moving.
4. **DoD OSBP / complementary pitches** — National CTA pipeline visibility (complements APEX centers; does not compete for counseling dollars).

First 6 months — how we measure success

KPI	Target
Signed 60-day director evals (APEX, EDC, or MBDA-adjacent)	3
Paid org license (\$18K+ minimum)	1
Grant applications submitted	2 (SBIR + one state/EDA)
NAPEX qualified director meetings	10+
Post-NAPEX pilots launched	2
EDC/MBDA landscape research doc delivered	1

You might be a fit if you have

Must have

- **3+ years** in GovCon, economic development, APEX/PTAC, SBDC, MBDA Business Center, NMSDC, or state commerce small business programs
- **Closed** at least one B2B or institutional deal (\$15K+ ACV) — center license, training contract, or gov-adjacent SaaS
- **Written** at least one federal or state grant application (SBIR, EDA, SBA, or state innovation fund) — submitted, not just "helped with"
- Can **demo a software product** and hold a technical conversation with a center director about client outcomes
- Understand **cooperative agreement reporting** — what APEX and SBDC centers actually upload to funders annually
- Willing to travel for NAPEX (Aug 2026) and 4–6 partner meetings/quarter

Strong plus

- Existing relationships with APEX center directors or state EDC program leads
- Experience with DoD small business programs (OSBP, CTAs, subcontracting plans)
- Minority business ecosystem network (MBDA, NMSDC, state MBE offices)
- Familiarity with USASpending, SAM.gov, and federal contracting data (you don't need to code — you need to sell what the data proves)
- Has worked alongside (not against) APEX counselors — referral/partner mindset

Not a fit

- Generic SaaS SDR/BDR with no gov or economic development background
- Proposal writer who won't pick up the phone or walk a trade show floor
- Anyone who needs 6 months to learn what a PTAC is

What we offer

- **Founding public-sector GTM role** — build the playbook, don't inherit one
- Direct line to founder + shipped product (Coach Mode, CTA filters, 317K contractor DB, Proposal Assist)
- Greenfield advisor network — you recruit three regional partnership advisors (prior assignments retired)
- Remote-first with travel budget for NAPEX and key partner meetings
- Compensation: competitive base + commission on closed org licenses + bonus on grant awards (*details discussed with finalists*)

About Mindy / GovCon Giants

- **Product:** [getmindy.ai](#) — AI GovCon intelligence for contractors and the coaches who serve them
 - **Data:** 317,106 USASpending recipient profiles, 88K+ cached SAM opportunities, 125K+ contracting contacts
 - **Customers:** Individual contractors (free alerts → Pro), plus org licenses for chambers and APEX/SBDC pilots in flight
 - **Mission:** Help small businesses win federal contracts — and help the centers that fund them prove it
-

How to apply

Email hello@govconedu.com with subject line "**Public Sector Partnerships — [Your Name]**" and include:

1. **Short note** (≤200 words) on the hardest institutional deal or grant you've closed/written — what made it work
2. **Resume or LinkedIn URL**
3. **One paragraph:** How would you open a first call with an APEX center director at NAPEX using the 35% CTA mandate? (Show you understand their funder, not our feature list.)

We review on a rolling basis. **Target start: before NAPEX (ideal by July 1, 2026).**

Related strategy doc: [projects/edc-mbda-partnerships/PRD-edc-mbda-partnerships.md](#)

Advisor Recruitment Brief — 3 Roles

Replaces: Ryan / Zach / Randie assignments (retired June 2026)

Reports to: Eric until FT Head of Partnerships hired

Comp draft: \$500 per qualified director intro (meeting booked) + **5% of first-year org license** on close. Eric approves before sign-up.

Role 1 — APEX Partnership Advisor

Territory: TX, FL, VA, MD, IL, CA (APEX-heavy states)

Opens: Warm intros to APEX center directors before NAPEX Aug 16–21, 2026

Ideal profile:

- Former APEX center director, deputy director, or senior counselor
- Can explain the **35% Critical Technology Area mandate** in one sentence
- Has director-level LinkedIn network (not just counselor peers)

First deliverable: 3 qualified director meetings booked before Jul 15

LinkedIn post (copy):

Hiring part-time advisors — GovCon platform partnerships

Mindy (getmindy.ai) is the AI GovCon intelligence platform. We're partnering with APEX Accelerators before NAPEX Orlando (Aug 2026).

Looking for a former **APEX center director** (or equivalent) to make warm intros to current directors. You open doors; we demo and close. Intro bounty + revenue share.

DM Eric Coffie or email hello@govconedu.com — subject "APEX Advisor."

Role 2 — SBDC & Chamber Advisor

Territory: National — focus on lead SBDC centers + regional chambers with GovCon cohorts

Opens: Cohort pilot intros (USHCC-style deals)

Ideal profile:

- Former SBDC lead center director or chamber VP of economic development
- Understands **EDMIS reporting fields** (capital accessed, jobs created) at a high level
- Not competing with APEX counseling — positions Mindy as reporting layer

First deliverable: 2 chamber or SBDC program director intros by Jul 31

LinkedIn post (copy):

Part-time opportunity — SBDC / chamber partnerships for federal contracting platform

Mindy helps coach-led orgs prove client outcomes (pursuits, teaming, contract attribution). Seeking someone with SBDC or chamber **program director** relationships for cohort pilot intros. Remote. Bounty + rev share. hello@govconedu.com — "SBDC Advisor."

Role 3 — Minority-Business Partnership Advisor

Territory: NMSDC regional councils + state HUB/MBE offices + MBDA-adjacent programs

Opens: Enterprise license conversations with councils and state minority business divisions

Ideal profile:

- NMSDC council alum, former MBDA Business Center staff, or state HUB office leader
- Understands MBDA 2025–26 disruption — pitches **state operators**, not assumed federal MBDA status
- Connected to corporate supplier diversity + federal contracting crossover

First deliverable: 2 intros (NMSDC council or state HUB) by Aug 1

LinkedIn post (copy):

Advisor role — minority business ecosystem × federal contracting platform

Mindy (getmindy.ai): 317K contractor search, MBE teaming, coach dashboards for program directors. Seeking advisor with **NMSDC / state HUB / MBDA-adjacent** network. Part-time, intro bounty + rev share. hello@govconedu.com — "MBE Advisor."

Screening questions (15-min call)

1. Name two center directors you could intro us to **this month** — specific names, not "I know people."
2. How would you position us to a director so we don't look like we're competing with APEX counseling?
3. Have you been inside a cooperative agreement renewal cycle? What metrics did funders care about most?

Pass: Specific names + correct funder metrics (contracts/CTA for APEX; capital/jobs for SBDC; jobs/MBE growth for EDC).

Agreement (lightweight — Eric sends after verbal yes)

- Non-exclusive advisory
 - Intros logged in shared sheet; bounty paid on **meeting held**, not close
 - Rev share paid on **collected** first-year license revenue within 12 months of intro
 - No authority to commit pricing — Eric signs all deals
-

June 14, 2026

DISA Vehicle Expiry Watch — Prototype Build Spec

For: DISA contact (the first warm gov prototype — GOVT-GTM-STRATEGY.md Track 1) **Status:** Spec — June 14, 2026 (build after Eric confirms shape) **Thesis:** Replace DISA's MANUAL spreadsheet tracking of IDIQ/IDV vehicles with automated expiry-watch + auto-notification to the **incumbent vendor** up to 6 months before expiration.

The real problem (Eric, from the DISA contact)

DISA tracks **all their IDIQ/IDV vehicles by hand in spreadsheets**. When a vehicle nears expiration they manually figure out who holds it and notify the incumbent. They want this **automated** — alert the **incumbent vendor** up to **6 months** before a vehicle expires.

So this is **NOT** a search/lookup tool (we almost built that). It's an **outbound notification workflow that replaces a manual process**. The before/after is the pitch:

- **Before:** spreadsheet + manual date-watching + hand-typed emails to vendors
 - **After:** upload once (or auto-seed) → system watches every expiry → auto-emails the incumbent at 6mo / 90d / 30d → DISA sees a dashboard, never touches a spreadsheet
-

What we already have to build on (don't reinvent)

Piece	Exists	Reuse for
IDV/IDIQ pull from USASpending	/api/app/idv-contracts + src/lib/bigquery/recipients.ts	Auto-seed DISA's vehicles (incumbent, end date, NAICS, ceiling)
Batch/resumable alert cron + email	/api/cron/pursuit-changes + sendEmail() (Resend primary)	The expiry-watch cron pattern, copy it
Dispatcher cron model	cron_jobs row → /api/cron/dispatch (NEVER vercel.json)	Schedule the daily expiry check
Recompete/expiry UI	RecompetesPanel.tsx	The dashboard surface
Award detail (ceiling, expiry, recipient)	src/lib/usaspending/award-detail.ts	Vehicle facts

This is assembly, not net-new infra. That's why DISA is the fastest prototype.

Data source — HYBRID, spreadsheet-anchored (resolves Eric's "not sure")

DISA already HAS the list (in spreadsheets). So:

1. **Primary: CSV upload.** DISA uploads their vehicle spreadsheet → we parse (PIID/vehicle #, incumbent name, **incumbent vendor email**, expiry date, optional NAICS/ceiling). Their data is authoritative — it's what they track today.
2. **Assist: auto-enrich from USASpending.** For each PIID/vehicle, pull our IDV data to fill missing fields (end date, ceiling, recipient/UEI) and flag mismatches ("spreadsheet says exp 2026-09, USASpending says 2026-12 — confirm").
3. **The gap USASpending CAN'T fill: the vendor's CONTACT EMAIL.** USASpending has the recipient name + UEI but **not a notification email**. DISA's spreadsheet has it (or they add it on upload). This is why upload is primary, not pure auto-pull.

Build plan (the prototype)

1. Table (hand-run SQL — no in-app DDL)

disa_watched_vehicles (migration → pbcopy → Eric runs in Supabase → confirm):

```
id uuid pk, org_email text (the DISA account), vehicle_piid text, vehicle_title text,
incumbent_name text, incumbent_uei text, incumbent_email text, -- the notify target
expiration_date date, ceiling_value numeric, naics text, agency text,
notify_6mo bool default true, notify_90d bool default true, notify_30d bool default true,
last_notified_stage text, -- '6mo' | '90d' | '30d' | null (so we don't double-send)
source text default 'upload', -- 'upload' | 'usaspending'
created_at timestamptz, updated_at timestamptz,
unique(org_email, vehicle_piid)
```

2. Ingest — CSV upload

- POST /api/app/disa/vehicles/upload — parse CSV, upsert rows, auto-enrich from idv-contracts, return a confirm list (filled vs. needs-attention). Strip NUL bytes from any pasted text.
- Reuse the upload/parse pattern from Proposal Assist's RFP upload.

3. Watch + notify — cron (the core)

- GET /api/cron/disa-vehicle-watch — batch/resumable, modeled on pursuit-changes:
 - Find vehicles whose expiration_date crosses a threshold (≤6mo / ≤90d / ≤30d) AND last_notified_stage not yet at that stage.
 - sendEmail() the **incumbent** ("Your contract [PIID] expires [date] — N months out") + cc the DISA org. Stamp last_notified_stage.
 - First run = snapshot only / no backfire on already-past dates.
- Schedule via a **cron_jobs row** (daily) → dispatcher. **NOT vercel.json.**

4. Dashboard — DISA-facing surface

- A panel (new tab or a DISA view of RecometesPanel): table of watched vehicles, expiry countdown, notify status per stage ("6mo  sent / 90d  / 30d —"), and the manual-override "notify now."
- The screenshot moment: **"47 vehicles watched · 12 expiring in 6mo · 8 incumbents auto-notified this month"** — the spreadsheet they used to maintain, now automated.

5. Demo access

- Stand up a DISA demo account (KV briefings:{email} + Supabase) so they can log in and see THEIR uploaded vehicles. (Per app_auth_header_pattern — every /app fetch sends getMIApiHeaders.)

Honest scope notes

- **The notification email content** needs DISA's voice — is it a courtesy notice, a recompetete heads-up, a sources-sought prompt? Confirm with the contact before first send (don't auto-email real vendors on a guess).
- **Sending to real vendors is outward-facing** — gate the live cron behind an env flag / "dry-run mode" until DISA approves the template + the vendor list. Demo = dry-run (show what WOULD send).
- **This is a workflow tool, not market intel** — it's a different product surface from Mindy's search. That's fine; it's what DISA actually needs, and it's the wedge (Anduril: solve their real problem first, expand later).
- **Expansion path:** once DISA's vehicles are in, the SAME data powers recompetete intel, incumbent analysis, and the market-research story — land the watch tool, expand to the platform.

Open items

- ☐ Confirm spec shape with Eric (this doc) → then build
- ☐ Confirm the notification email content/voice with the DISA contact
- ☐ Confirm: does DISA want the incumbent emailed directly by us, or a draft DISA sends? (changes whether we need their vendor emails or just generate the notices)
- ☐ Hand-run the disa_watched_vehicles migration
- ☐ Build ingest → watch cron → dashboard → demo account
- ☐ Keep live sends behind a dry-run flag until DISA approves

Created June 14, 2026. The DISA prototype is an EXPIRY-WATCH + INCUMBENT-NOTIFICATION workflow that replaces manual spreadsheet tracking of IDIQ/IDV vehicles — assembled from existing pieces (idv-contracts pull + pursuit-changes cron pattern + sendEmail + dispatcher). NOT the search/export tool first scoped. Build after Eric confirms shape + notification voice.

Army MICC — Market Research Report (MRR) Generator Spec

For: Army MICC contracting officer (warm contact #3); also feeds Navy OSBP (shared engine) **Source of truth:** docs/Market Research Report Template (MAY 2026).pdf — the OFFICIAL Army MRR template (post-FAR-Overhaul, RFO/DFARS class deviations eff. 01 Feb 2026). The KO sent this as the example. We match it exactly. **Scope (Eric):** auto-fill the DATA sections Mindy has real data for; bracket the CO's judgment sections. Honest, defensible, exports the official .docx.

What this is (and the relationship to OSBP)

The MRR is the CO's **formal acquisition document** — becomes part of the contract file, supports the Acquisition Plan + Small Business Plan, used for actions over the SAT. Different doc from what OSBP produces — but **the OSBP vendor list IS an input to §11/§12 of this MRR**. One engine (findCapableSmallBusinesses, the PSC-scored search) serves both the Navy sourcing tool AND the Army MRR. That's the product story.

The KO's pain: assembling this by hand takes days (pull prior contracts, find vendors, compute the market picture, write it up). Mindy turns the data sections into a first draft from a PSC + NAICS.

Section → data mapping (the build)

Mindy auto-fills (REAL data, cited): | MRR § | Section | Mindy source | |---|---| | **§5** | Taxonomy: PSC, PSC desc, NAICS, NAICS desc, **size standard** | PSC/NAICS input + keywordCoverage + SBA size-standard lookup | | **§9** | **Procurement History** table: contract #, contractor, type, method, offerors, \$, POP | awards table grouped by recipient/PIID for the NAICS/PSC (new lightweight query) | | **§11** | **Potential Supplier Information** table: vendor, CAGE, **business size**, location, POC, capability | ★ findCapableSmallBusinesses (the PSC-scored engine) | | **§12** | **Small Business Opportunities**: set-aside recommendation (8a/HUBZone/SDVOSB/WOSB) | set-aside signal + small-biz footprint from §11 results | | **§15** | **Market Intelligence**: # suppliers, market \$, small-business footprint, socioeconomic participation, competition level | keywordCoverage (market \$, supplier count) + §11 aggregates |

Mindy BRACKETS (the CO's judgment — never fake):

- **§4 Independent Government Estimate (IGE)** — the CO's cost estimate. [INSERT IGE] + the table skeleton.
- **§1–3** general info (program, POCs, contracting activity) — [bracketed] fields.
- **§6–8** requirement description / performance / background — CO writes (it's their requirement).
- **§10 Non-Commercial Rationale, §13 Mandatory Sources, §14 Techniques Used** — CO/compliance.
- **§16 Conclusions** — we can pre-populate a *draft* recommendation from §12, clearly labeled "draft — CO to finalize."

- **Part 4 Signatures + RFA approval pages** — untouched skeleton (digital-signature blocks).

Honesty rule: every auto-filled number cites its source (USASpending award data, as-of date). Bracketed = the CO's input. We never invent an IGE, a commerciality determination, or a signature.

Build

1. **Lightweight procurement-history query** (`src/lib/bigquery/recipients.ts`): `procurementHistoryByCode({ psc?, naics?, limit })` → recent awards grouped to rows of `{contract #/PIID, contractor, contract_type, set_aside/method, obligated $, POP dates}`. Reuses the awards table (already proven). For §9.
 2. **MRR assembler** (`src/lib/micc/mrr.ts`): pulls §5/§9/§11/§12/§15 data in parallel, returns a structured MRR object + the bracketed skeleton for the rest.
 3. **API GET** `/api/app/micc/mrr?email=&psc=&naics=&title=` → the structured MRR (for on-screen preview) ; **POST** `.../mrr/docx` → the official .docx (reuse the docx lib + the template layout).
 4. **Panel** `MiccMrrPanel`: PSC + NAICS + requirement title inputs → "Generate MRR draft" → on-screen preview of the filled sections (+ bracketed list of what the CO must complete) → "Download .docx".
 5. Sidebar entry "Market Research Report" (pro-tier, demo surface). `AppPanel micc-mrr`.
-

Why this lands with a KO

- It's THEIR exact template (MAY 2026, the one they sent) — zero translation.
- It does the tedious, data-heavy 80% (procurement history + supplier table + market picture) and hands them a Word doc to finish — not a black box, not a slide.
- It's honest about the 20% only they can do (IGE, commerciality, signatures) — which is what earns a CO's trust vs. a tool that pretends to write the whole determination.

Open items

- ☐ Build the 5 data sections + bracketed skeleton + .docx export
- ☐ SBA size-standard lookup for §5 (table by NAICS) — or bracket if not readily available
- ☐ Confirm with the MICC KO: is the MAY 2026 template the current one they use? any local MICC addenda?
- ☐ Demo: seed a sample PSC+NAICS (e.g. R425 / 541330) so the preview is populated

Created June 14, 2026. The MRR generator = assemble existing engines (findCapableSmallBusinesses + procurement history + keywordCoverage) into the official Army MAY-2026 template; auto-fill data sections, bracket CO judgment, export .docx. Shares the supplier engine with the Navy OSBP tool.

Public Sector Partnerships & Funding — One-Pager

Eric · June 14, 2026 · full brief: TEAM-BRIEF.md

What we're doing: Sell Mindy's **Coach Mode** (org license over a roster of small businesses) to the organizations that fund federal small-business programs — APEX Accelerators, SBDCs, EDCs, state minority-business divisions, NMSDC councils. We help them **prove outcomes to their funders and match clients to contracts/partners**. Two revenue lines: **org licenses** (18K–200K, primary) + **non-dilutive grants** (SBIR/EDA/SBA, fund the build).

Why we win (the wedge — not "free alerts"):

1. 317K contractor profiles → find primes/incumbents/teammates
2. DoD CTA filters → the 35% mandate APEX must report on
3. Teaming → match small firms to primes in-lane
4. UEI win attribution → prove *their* clients won (*building, live by NAPEX*)

Pitch: "We don't just help your clients find opportunities — we help you prove placement into the defense supply chain and match them to primes in Critical Technology Areas." **We take reporting + matching dollars, not counseling dollars. Partner with APEX, don't replace it.**

WHO WE'RE BRINGING ON

- **FT Head of Partnerships & Funding** (priority #1 — close before NAPEX): one owner, ~60% close partnerships / ~40% write grants. Credible insider (ex-APEX/SBDC/MBDA), not a generic SaaS rep.
- **3 regional advisors** (open doors; FT hire closes): APEX · SBDC/chamber · minority-business. Draft comp: \$500/qualified intro + 5% first-year license (*Eric approves before signing*).

WHO WE TARGET (*all verified — see landscape-research-phase2.md*)

- **P1 EDC:** Prince George's County EDC (MD) → 60-day eval → 50K–75K cohort
- **P1 NMSDC:** CRMSDC (Sharon Pinder — runs a 12-wk GovCon Incubator); GMSDC
- **P1** 💡 **State divisions:** TX HUB · MD GOSBA · CA DGS-OSDS — *the uncrowded lead channel*
- **P2:** county vendor academies (Hillsborough FL, Loudoun VA); surviving MBDA operators (FSMSDC, DFW)

TWO STRATEGIC CALLS

- 🚫 **MBDA centers = not viable now** (gutted 2025, agreements end Aug 31 2026) → go to the surviving operator + state division, never the "MBDA center" badge.
- 💡 **State-cert programs = lead channel** — un-served by opp-intel tooling, captive certified-firm rosters + vendor forums, natural state→federal upsell. Make a splash away from the crowd.

THE ANCHOR — **book the room: ★ NAPEX, Aug 16–20, Orlando — \$1,500 govt booth.** 400+ APEX directors, cheapest + most on-target, before year-end. **Single highest-ROI action.** (Also: ASBDC Sept 29–Oct 1 Atlanta. NMSDC Oct 25–28 LA — confirm eligibility. MED Week is dead.)

NEAR-TERM GRANTS: DoD SBIR Release 26.3 (opens Jun 24) · MBDA Rural Business Center (closes Jun 29).

90 DAYS: hire + book NAPEX + PGC outreach (now) → UEI attribution live (Jul) → **NAPEX (Aug): 10+ director meetings** → first EDC pilot + SBIR draft (Sep) → 2nd paid license (Q4). **6-mo scoreboard:** 3 evals · 1 paid license · 10+ NAPEX meetings · 2 pilots · 2 grant apps.

RULES: verify every fact (no invented contacts/dates) · confirm funding before pitching MBDA-tied orgs · EDC pricing ≠ chamber pricing · demo only what ships.

Outreach Templates — EDC / MBDA-Adjacent

Copy, personalize [brackets], send from Eric or hello@govconedu.com.

§1 — PGC EDC (P1 target)

To: kbandrews@co.pg.md.us

Subject: Mindy x Procurement 360 — tracking outcomes after the room

Hi Kimberlee,

I'm Eric Coffie with GovCon Giants — we built **Mindy** (getmindy.ai), the AI GovCon intelligence platform used by federal contractors for daily opportunity briefings, market research, and proposal support.

I've been following **Procurement 360: Targeting Opportunities** — the model of aligning one agency per session with decision-makers in the room is exactly right. What we hear from EDCs running programs like yours is that the hard part isn't getting businesses **into** the room — it's proving **what happened after**: who pursued federal opportunities, who matched with primes in defense tech areas, and what contract activity your cohort generated for county reporting.

Mindy is built for that second half:

- **Coach dashboard** for your team — manage up to 20–30 cohort firms from one director workspace
- **317K federal contractor search** — prime/teaming match by NAICS, set-aside, agency, state
- **DoD Critical Technology Area filters** — align pursuits to the areas DoD is now scoring (the 35% mandate APEX centers report on)
- **Quarterly outcome rollup** — pursuit activity + contract attribution for funder reports (we're shipping win attribution this summer)

We'd like to offer PGCEDC a **complimentary 60-day director eval** — no cost, no procurement cycle — so you can run your next Procurement 360 cohort through Mindy and see if the reporting story is useful before any budget conversation.

Would you have 20 minutes next week for a demo? I'm happy to work around your Feb 10 session prep or the following series date.

Best,
Eric Coffie
Founder, GovCon Giants / Mindy
hello@govconedu.com | getmindy.ai

§2 — State HUB / minority business division (NC model)

To: ncmbda@doa.nc.gov (or state-specific HUB contact)
Subject: Platform support for HUB clients pursuing federal contracts

Hi [Name],

Following the changes to the federal MBDA Business Center cooperative agreement, I understand the **NC HUB Office** continues serving minority and historically underutilized businesses on state contracting — and many of those firms also pursue federal opportunities.

We built **Mindy** to help coach-led organizations prove client outcomes: daily federal briefings, 317K contractor/teaming search, and a director dashboard that rolls up pursuit activity for quarterly reports.

Would a 20-minute demo be useful? We offer a **60-day complimentary eval** for program directors — no obligation.

Best,
Eric Coffie

§3 — NMSDC regional council

To: [Council president — look up on nmsdc.org regional affiliate page]
Subject: MBE federal contracting intelligence for your certified firms

Hi [Name],

NMSDC certifies MBEs for corporate supplier diversity. Many of your members also pursue **federal** contracts — where the search, teaming, and reporting tools are fragmented.

Mindy gives regional councils a white-label coach platform: member daily briefings, prime/teaming search across 317K USASpending recipients, and rollout reporting your team can use in corporate partnership conversations.

We're exploring partnerships with a small number of regional councils this fall. Open to a brief intro call?

Eric Coffie — getmindy.ai

§4 — Advisor recruitment (LinkedIn DM)

Subject line (InMail): Part-time — APEX / SBDC / NMSDC intros for GovCon platform

Hi [Name],

I'm Eric — founder of Mindy (getmindy.ai), the GovCon intelligence platform. We're expanding partnerships with APEX centers, EDCs, and minority-business programs before NAPEX in August.

Looking for a part-time **partnership advisor** with real relationships among [APEX directors / SBDC leads / NMSDC councils] — you open doors, we close. Comp: intro bounty + % of first-year org license.

Former APEX director, SBDC lead, or MBDA/NMSDC operator? 15-min call this week?

§5 — Follow-up (no reply after 7 days)

Hi [Name],

Quick bump on Mindy x [Procurement 360 / your HUB program] — happy to send a 2-minute screen recording of the coach dashboard + CTA filters instead of a live call if that's easier.

Either way, congrats on [specific program milestone from their site/news].

Eric
