

One system that runs your counselors' BD work — and produces the numbers you report to SBA

Mindy is an AI-powered federal market intelligence platform: daily opportunity ranking, agency forecasts, expiring contracts, teaming, a 317K-contractor database, pipeline tracking, and per-client workspaces. Your 8 counselors (12 with the new hires) manage the ~1,000 businesses you serve across the year from one dashboard.

The point isn't more tools. It's **capability progression made measurable** — moving each business from an opportunity, to an honest read on whether they can win it, to closing the gap — and exporting that progression as the report your funder already expects.

THE PROBLEM THIS SOLVES FOR GCAP

Your value is building capability, not handing out leads. But the work of moving a business from "here's an opportunity" to "here's an honest assessment of your ability to win it, and here's the gap to close" lives across spreadsheets, inboxes, and counselors' heads. And every quarter that progress has to be re-assembled by hand into a report for SBTDC / SBA.

Mindy makes the capability work the system of record, so the reporting is a by-product, not a second job.

WHAT GCAP GETS

Capability	Counselor (org admin)	Client business (managed)
My Clients — each business in its own workspace, one dashboard across all ~1,000	✓ Manages every client	Managed by counselor (own login optional)
Today's Intel — AI-ranked daily opportunities, scoped to each client's NAICS/keywords/agencies	✓ Per client	✓ Own free alerts
Target agencies, pipeline, teaming, market research, forecasts, expiring contracts, 317K contractor DB	✓ Full platform	✓ Scoped to their profile
Capability progression tracking — SAM · certification (WOSB/HUBZone/8(a)) · capability statement · first bid · first award	✓ Per client, milestone by milestone	Visible in their workspace
GCAP-branded org tab + internal news	✓	✓
Quarterly funder report — the SBTDC / SBA numbers, exported	✓ One click	—

Included in the license: the full platform above, plus Proposal Assist for every counselor seat. Carved out: for client workspaces, Proposal Assist is an optional \$99/mo per-user add-on the client buys directly — so the flat license price never moves.

WHY THIS IS A CENTER LICENSE, NOT 12 LOGINS

The Center License is the admin tier — built for an organization managing a large caseload, not a set of individual users. That's where the value lives:

- ✓ **Unlimited client workspaces** — every one of the ~1,000 businesses you serve gets its own, included; never capped, never re-quoted as clients cycle in and out.
- ✓ **One org dashboard across all counselors** — not 12 separate accounts; the director sees the whole caseload in one place.
- ✓ **Reassign clients instantly when a counselor leaves** — the book of business stays with GCAP, not locked in a departing person's login.
- ✓ **GCAP-branded org tab** — your counselors and clients work inside your program, not a generic tool.
- ✓ **One-click quarterly SBTDC / SBA funder export** — the report you hand your funder, produced by the system instead of hand-built every quarter.
- ✓ **Onboarding & support included** — guided kickoff, done-for-you cohort load, a named contact, and quarterly office hours (detailed below).

WHAT THE \$36,000 ACTUALLY DELIVERS

Look at it per business instead of per seat. Each of the ~1,000 businesses you serve would pay **\$149/mo — \$1,788/yr** to run this federal-intelligence platform on their own. Delivered through your counselors, that's:

1,000 businesses x Mindy Pro (\$1,788/yr retail)	≈ \$1.78M/yr of platform value
GCAP Center License	\$36,000/yr
Cost per business you serve	≈ \$36/yr — about \$3 per business per month

You're delivering \$149/mo federal market intelligence to every business in your portfolio for roughly \$3 a month each — plus the quarterly funder report that used to be a second job. The license isn't 12 seats. It's your entire 1,000-business portfolio on one platform, priced at the team that runs it.

THE REPORTING ENGINE — THE PART WE MOST WANT TO GET RIGHT

If Mindy produces the numbers you already have to report, it stops being another tool and becomes the system that renews your funding. Mindy tracks each business's progression through the milestones that matter to SBA, per counselor, and rolls it up:

What GCAP reports	How Mindy produces it
Businesses served + activity	Per-client workspaces, counselor assignment, last-touch, pursuits tracked
Capability milestones reached	SAM registration, certification, capability statement, first bid, first award — timestamped per business
Pipeline & outcomes	Opportunities pursued, bids submitted, awards won — exportable by quarter
Counselor efficiency	One dashboard across all clients; no re-keying between systems

We'll confirm the exact fields against the report you hand SBTDC / SBA today, so the export matches your funder's format — not a generic dashboard.

HOW WE START — PROVE IT, RUN A 6-MONTH TERM, THEN DECIDE TOGETHER

No one gets locked into a year sight-unseen. We start small, run a real 6-month term, and both sides confirm the economics work before going further.

1

Director pilot — \$0, 30 days

Director org-admin + up to 2 counselors onboard a first cohort of ~25 client workspaces from their capability statements (NAICS, keywords, target agencies auto-seeded). Prove the counselor workflow and the funder report on your own data. Converts to the initial term at day 30 — or access pauses until it does.

2

6-month initial term

Activate your counselor seats (8 today, 12 as the new hires land), the ~1,000 client workspaces, GCAP-branded tab, and quarterly funder export. Billed at your \$250/seat/mo rate for the 6-month term — one budgetable line, with a real exit if either side isn't delivering (see terms).

3

Joint review, then continue

At month 6 we sit down together: does the platform deliver the outcomes and the funder report, and do the economics work for both parties? If yes, we continue by mutual agreement — no automatic 12-month lock. If the fit isn't there, either side can walk.

SUPPORT & ONBOARDING — YOU'RE NOT STANDING THIS UP ALONE

The difference between 12 people buying self-serve logins and a managed center license is that a real person helps you launch it and keeps you moving. All of the following is **included in the license**, not billed hourly:

1

Guided kickoff + done-for-you cohort load

We run a live onboarding with your director and counselors, set up the GCAP org and seats, and **load your first cohort of client workspaces for you** — bulk-imported from your client list, with NAICS, keywords, and target agencies auto-seeded from each capability statement. You start with a working system, not an empty dashboard.

2

Named onboarding contact

One person is your point of contact through onboarding and your first quarter — the human who knows your setup, so a counselor's question never goes to a generic queue.

3

Ongoing support + quarterly office hours

Email/ticket support for your whole team with a committed response time, plus a **quarterly office-hours session** — group Q&A timed to your funder-report cadence, so counselors get help right when the report is due.

Standing up a 1,000-business caseload isn't a set-it-yourself job — the kickoff, the cohort load, the named contact, and the office hours are part of what the center license is for.

INVESTMENT

The Center License — the org/admin tier — lists at **\$400 per seat / month**. Your **state-funded team of 8+ counselors** qualifies for our volume & public-sector rate of **\$250 per seat / month**. Every one of the ~1,000 businesses you serve across the year gets its own workspace, **included** — not metered, not capped, not re-quoted as clients cycle in and out. The price tracks your team, not your caseload.

GCAP Center License	List (\$400/seat)	Your rate (\$250/seat)	What it covers
Start now — 8 counselors	\$38,400/yr	\$24,000/yr	Today's team · ~1,000 client workspaces included
Full funded team — 12 counselors	\$57,600/yr	\$36,000/yr	Incl. the 4 new hires · ~1,000 workspaces · saves \$21,600/yr off list

Same \$250/seat rate whether you activate at 8 now (**\$24,000/yr**) or your full 12 (**\$36,000/yr**) — add the new hires as they land, no re-quote. · Proposal Assist is a separate optional add-on (below).

6-month initial term — no annual lock. The annual rate above is the price basis; we commit for a **6-month initial term**, billed at the same \$250/seat rate — **\$18,000 for the 6 months** at 12 counselors (\$12,000 at 8) — then a joint economics review before continuing. Either party can terminate the term in writing for non-performance or non-delivery (30-day cure), with a pro-rata refund of unused prepaid. Full terms below.

How the rate works: the admin tier lists at \$400/seat because it's a heavier product to build and maintain — cross-counselor dashboard, client reassignment, roll-up reporting, funder export, org branding, and support. Your **\$250/seat rate applies at 8+ seats** as a combined volume and state-funded/public-sector discount — a **37% saving off list**. (The tier carries a 5-seat minimum; at 8 growing to 12 and ~1,000 businesses, GCAP is squarely in the volume band.)

RECOMMENDED

Pilot → 6-month term → joint review

Prove ROI on your own data, run a real 6-month term, then decide together — no annual lock

\$0 → \$18,000 / 6 mo

\$0 30-day pilot, then a 6-month term at your \$250/seat rate — **\$18,000** (12 counselors; \$12,000 at 8). Annual-equivalent \$36,000/yr, \$21,600 under the \$57,600 list.

- ✓ **Phase 1 (30 days, \$0):** director org-admin + first client workspaces + the report on your data
- ✓ **Phase 2 (6-month term):** activate your counselor seats · manage ~1,000 client workspaces
- ✓ **Phase 3 (month-6 review):** confirm outcomes + economics, continue by mutual agreement — or either party exits
- ✓ Full intel suite: forecasts, expiring contracts, teaming, 317K contractor DB, market research
- ✓ Capability-progression tracking + GCAP-branded org tab + quarterly funder export
- ✓ Guided kickoff + done-for-you cohort load, named contact, quarterly office hours

Full license — day one

Best when the technology line is already approved

\$36,000/yr

12-counselor license at your \$250/seat rate (\$400 list) · Proposal Assist separate

- ✓ Your counselor seats · ~1,000 managed client workspaces included
- ✓ Everything in the platform layer, live day one
- ✓ GCAP branding + quarterly funder report
- ✓ Named onboarding contact
- ✓ **After the 6-month review — optional multi-year lock-in savings:** if you choose to commit for a longer run, 2-yr = 8% off (**\$33,120/yr**) · 3-yr = 12% off (**\$31,680/yr**). Never required — the default is a 6-month term with no annual lock.

Optional add-on — Proposal Assist

AI proposal drafting — a fixed monthly add-on, so the flat license price never moves

- ✓ AI-assisted proposal drafting: compliance matrix, bid/no-bid gate, response drafts
- ✓ **Included with every counselor seat** — your counselors have Proposal Assist as part of their seat, at no extra charge, to help clients draft.
- ✓ **For client workspaces: a \$99/mo per-user add-on**, purchased directly by the client who wants to draft on their own. Off by default; a client turns it on only if they want it. Not billed to GCAP.
- ✓ Fixed monthly — no metering, no per-draft charges. A client can add or drop it any month.

Kept out of the flat license on purpose: counselors are fully equipped, and a motivated client who wants to self-draft simply adds it for \$99/mo on their own account — pure upside for the businesses you serve, with zero effect on GCAP's budget or price.

Everything your counselors do **inside the Mindy platform is unlimited under the flat license** — running Mindy live in coaching sessions across all ~1,000 clients, demos, opportunity scans, contractor lookups, capability searches, and pipeline work. None of it meters; none of it moves the price.

WHAT'S INCLUDED — AND THE TWO THINGS THAT AREN'T

So there's no surprise at contracting, here is exactly where the flat license stops and the two optional add-ons begin:

✓ Included — unlimited

- ✓ Every in-platform tool: Today's Intel, forecasts, expiring contracts, teaming, market research
- ✓ The full 317K-contractor database — profiles, lookups, and capability searches
- ✓ Per-client workspaces, pipeline, capability-progression tracking
- ✓ Org admin, GCAP-branded tab, quarterly funder export
- ✓ Onboarding, named contact, support, quarterly office hours

✗ Not in the flat license — optional add-ons

- ✓ **Proposal Assist** — the AI proposal-drafting feature. **Included with every counselor seat**. For client workspaces it's an optional **\$99/mo per-user add-on the client buys directly** — off by default, never billed to GCAP.
- ✓ **MCP / API credits** — the programmatic credit system on our site (for connecting Mindy to outside AI tools) is a **separate Pro-member product**, sold as prepaid credit packs. The GCAP license is a seat license to work *inside* the platform; it does not include MCP/API credits. A counselor who wants the API channel buys credits like any Pro member.

*Keeping both out of the flat license is exactly what lets the center price stay **flat and budgetable** — Proposal Assist is a simple \$99/mo per-user add-on a client can turn on or off, and MCP/API credits are a separate Pro-member product. Neither ever changes what GCAP pays.*

WHY THIS FITS YOUR FUNDER'S BUDGET

Funder need	How Mindy delivers
Measurable client outcomes	Capability milestones + pursuits + awards, tracked per business, exported quarterly
Hands-on federal BD capability	Live platform: SAM opportunities, forecasts, recompetes, teaming, 317K contractor database
Technology / platform line item	Flat funded-team license at the \$36K/yr rate — billed as a 6-month initial term (\$18K), one budgetable PO line, workspaces included, no caseload true-ups
Counselor capacity as you grow to 12	One dashboard across all ~1,000 clients; new counselors onboard into the same system

Next step

A 30-minute working session: we open the platform on a few of your real clients, and you show us the report you hand SBTDC / SBA so we can match the export. Provision director access at getmindy.ai/app.

GovCon Giants · Mindy Federal Market Intelligence

Proposal valid 90 days · Pricing for a single GCAP center; multi-site / network terms separate

Terms & scope. The Center License grants unlimited use of the Mindy platform *inside the application* (getmindy.ai) for the licensed counselor seats and their managed client workspaces. **Term.** Following the \$0 30-day pilot, the initial commitment is a **6-month term** at the \$250/seat/mo rate, prepaid (\$18,000 at 12 seats / \$12,000 at 8). At month 6 the parties jointly review outcomes and economics and continue by **mutual written agreement** — there is no automatic annual renewal or 12-month lock. **Termination for cause.** Either party may terminate in writing for material non-performance or non-delivery; the other party has **30 days to cure** after written notice, and if the default is not cured, the agreement terminates with a **pro-rata refund of any unused prepaid fees**. **Not included in the license:** (1) **Proposal Assist**, the AI proposal-drafting feature — included with every counselor seat, and available to managed client workspaces only as an optional add-on the client purchases directly at \$99/mo per user (not billed to GCAP); and (2) **MCP / API credits** — the programmatic credit system offered on our site is a separate Pro-member product sold as prepaid credit packs and is *not* included in this seat license. In-application tool usage (including the contractor database and capability searches) is unlimited and does not meter. Rate: \$400/seat/mo list; \$250/seat/mo at 8+ seats (volume & public-sector). Final terms set in the service agreement.
